SUPPLEMENTARY INFORMATION:

Title: Innovative Bridge Research and Deployment (IBRD) Program.

Background: The Innovative Bridge Research and Deployment (IBRD) program was established by the passage of Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), Public Law 109-59 on Aug. 10, 2005. Per Section 5202(b)(1) of SAFETEA-LU, the Secretary shall establish and carry out a program to promote, demonstrate, evaluate, and document the application of innovative designs, materials, and construction methods in the construction, repair, and rehabilitation of bridges and other highway structures.

This program was funded by SAFETEA-LU, Section 5101(a)(1) at \$13.1 M for each of the fiscal years 2005 through 2009. Of this amount, \$4.125 M for fiscal years 2006 through 2009 was directed to conduct research and deploy technologies related to high-performance concrete bridges. The

actual amount available varied in yearly congressional appropriations. For fiscal year 2008, Congress rescinded the IBRD program. Under the current Continuing Resolution, the IBRD Program is authorized and continued for FY 2010.

The IBRD activities include identification and selection of candidate projects from 50 State DOTs, Puerto Rico and the District of Columbia, which meet one or more goals of the program as established by the Congress. Projects may be selected that meet one or more program goals as follows:

A. The development of new, cost-effective, innovative highway bridge applications;

B. The development of construction techniques to increase safety and reduce construction time and traffic congestion;

C. The development of engineering design criteria for innovative products, materials, and structural systems for use in highway bridges and structures;

D. The reduction of maintenance costs and life-cycle costs of bridges, including costs of new construction, replacement or rehabilitation of deficient bridges;

E. The development of highway bridges and structures that will withstand natural disasters;

F. The documentation and wide dissemination of objective evaluations of the performance and benefits of these innovative designs, materials, and construction methods;

G. The effective transfer of resulting information and technology; and

H. The development of improved methods to detect bridge scour and economical bridge foundation designs that will withstand bridge scour.

Additional activities include collection of project information, documentation, promotion and wide dissemination of objective evaluations of the performance and benefits of these innovative designs, materials, and construction methods resulting from the project studies.

Respondents: 50 State Departments of Transportation, the District of Columbia and Puerto Rico.

Frequency: Annual.

Estimated Average Burden per Response: 1 hour.

Estimated Total Annual Burden Hours: It is estimated that a total of 100 responses will be received to give us a total annual burden of 100 hours.

DATES: Comments must be submitted on or before December 3, 2009.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Office of Safety, Planning and Evaluation Division, RRS-21, Federal Railroad Administration, 1200 New Jersey Ave., SE., 3rd Floor, Mail Stop 25, Washington, DC 20590 (telephone: (202) 493-6292), or Ms. Nakia Jackson, Office of Information Technology, RAD-20, Federal Railroad Administration, 1200 New Jersey Ave., SE., 3rd Floor, Mail Stop 35, Washington, DC 20590 (telephone: (202) 493-6073). (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Public Law No. 104-13, Section 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501-3520), and its implementing regulations, 5 CFR Part 1320, require Federal agencies to issue

two notices seeking public comment on information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), 1320.12. On August 24, 2009, FRA published a 60-day notice in the **Federal Register** soliciting comment on this ICR that the agency was seeking OMB approval. 74 FR 42732. FRA received no comments in response to this notice.

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30 day notice is published. 44 U.S.C. 3507 (b)-(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30 day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.

The summary below describes the nature of the information collection requirement (ICR) and the expected burden for the ICR being submitted for clearance by OMB as required by the PRA.

Title: ARRA Solicitation of Applications and Notice of Funds Availability for High-Speed Rail Corridors and Intercity Passenger Rail Service—Capital Assistance and Planning Grants Program.

OMB Control Number: 2130–0583.

Type of Request: Regular Approval of an Emergency Clearance.

Affected Public: 50 States and Amtrak.

Abstract: On June 23, 2009, FRA published a Notice of Funds Availability (NOFA) and Interim Guidance for the High-Speed Rail (HSR)/Intercity Passenger Rail (IPR) Grant Program. *See* 74 FR 29900. The NOFA and Interim Guidance documents and additional information about the HSR/IPR Grant Program are available on FRA's public Web site at <http://www.fra.dot.gov/us/content/2243>. FRA plans on publishing a Final Guidance shortly in the **Federal Register**, and will also then place the Final Guidance on its Web site. The HSR/IPR Grant Program builds upon President Obama's "Vision for High-Speed Rail in America," which was issued on April 16, 2009, and which describes a

collaborative effort among the Federal Government, States, railroads and other key stakeholder to transform America's transportation system by investing in an efficient, high-speed passenger rail network of 100 to 600 mile intercity corridors.

The Interim/Final Guidance documents detail HSR/IPR Grant Program funding opportunities as well as specific application requirements and procedures. The evaluation and selection criteria are intended to prioritize projects that deliver transportation, economic recovery and other public benefits, including energy independence, environmental quality, and livable communities; ensure project success through effective program management, financial planning and stakeholder commitments; and emphasize a balanced approach to project types, locations, innovation, and timing. The program grant funds are being made available under the American Recovery and Reinvestment Act of 2009 (ARRA) and the Department of Transportation Appropriations Act of fiscal years 2008 and 2009. ARRA established the HSRIPR Program—a new program that provides \$8 billion to support the Administration's vision for developing high-speed rail in America.
