

develop a National Action Plan on Demand Response (National Action Plan). The purpose of this technical conference is to elicit input from interested stakeholders on the possible elements of the National Action Plan as discussed in the *Discussion Draft on Possible Elements of a National Action Plan on Demand Response* (Discussion Draft), released today in the above-referenced docket number. Commission Staff will utilize the Discussion Draft at the technical conference to frame the discussions.

The technical conference will include panel sessions on the first day to discuss the overall approach and scope of the Discussion Draft. The second day will include breakout sessions that will focus on each of the three statutory objectives listed below. A closing plenary session will summarize the break-out discussions.

The conference will be open to the public, and all interested persons are invited to participate. For logistical purposes, staff requests those planning to attend to pre-register via an electronic form at: <https://www.ferc.gov/whats-new/registration/nap-11-19-form.asp>. Advance registration is not required to participate.

The Commission is extending the deadline to Friday, November 6, 2009 for those interested in speaking during the November 19th afternoon panels at the conference. Those interested should complete an online form describing the elements that they will address at <https://www.ferc.gov/whats-new/registration/nap-11-19-speaker-form.asp>. The Commission also requests that those parties that previously completed the online speaker form resubmit it to indicate that they are available on the new date. Due to time constraints, we may not be able to accommodate all those interested in speaking on panels; however, the panels will represent a balance of stakeholder interests.

All conference attendees are invited to attend the panel sessions on November 19th, participate in the break-out session discussions and attend the plenary session on November 20th. A detailed agenda, including panel speakers, will be published at a later date.

The Commission is seeking input in the form of written comments on the Discussion Draft and discussions at the technical conference on the best ways to meet the objectives that Congress identified for the National Action Plan: (1) Identification of requirements for

technical assistance to States to allow them to maximize the amount of demand response resources that can be developed and deployed; (2) design and identification of requirements for implementation of a national communications program that includes broad-based customer education and support; (3) development or identification of analytical tools, information, model regulatory provisions, model contracts, and other support materials for use by customers, States, utilities and demand response providers.²

Written comments on the Discussion Draft and on the discussions at the technical conference are due by Friday, December 4, 2009. Commission Staff will draw on the written comments received and the discussions at the technical conferences to prepare the National Action Plan. Comments may be filed electronically via the Internet. Instructions for submitting comments are available on the Commission's Web site (<http://www.ferc.gov/docs-filing/ferconline.asp>) under the "eFiling" link. Pesticides; Draft Guidance for Pesticide Registrants on Pesticide Drift Labeling

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The Agency is announcing the availability of and seeking public comment on two documents – a draft Pesticide Registration Notice (draft PR Notice) entitled "Pesticide Drift Labeling" (PRN 2009-X) and a draft explanatory document entitled "Pesticide Drift Labeling Interpretation." PR Notices are issued by the Office of Pesticide Programs (OPP) to inform pesticide registrants and other interested persons about important policies, procedures, and registration related decisions, and serve to provide guidance to pesticide registrants and OPP personnel. This particular draft PR Notice provides guidance to the applicants and registrants of certain pesticide products for revising labeling statements intended to protect people and other non-target organisms and sites from adverse effects that may be caused by off-target pesticide drift. The draft explanatory document provides guidance for state and tribal regulatory officials responsible for enforcement of user compliance with the requirements of pesticide labeling on how to interpret the labeling statements contained in the draft PR Notice. An additional supporting document, entitled "Draft PR Notice 2009-X: Additional Information and Questions for Commenters," provides background and supplemental information that explain the Agency's rationale for its proposed guidance on drift labeling. This document also requests responses by readers to specific questions concerning draft PR Notice 2009-X. All three documents are available in the public docket.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me

This action is directed to those persons who manufacture, distribute, sell, apply, or regulate pesticide products that are for use outdoors, including agricultural, commercial, and residential products (NAICS codes 32532 and 32561). Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the information in this notice, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in

accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

EPA has identified questions about the PR Notice on which the Agency would like to receive specific input from commenters. These questions are presented in a supporting document entitled "Draft PR Notice 2009-X: Additional Information and Questions for Commenters," which is available in the public docket.

II. What Guidance Does this PR Notice Provide?

EPA's purpose in issuing draft PR Notice 2009-X is to provide guidance to registrants and applicants for registration on labeling statements concerning pesticide drift, and to inform the public of EPA's policies with regard to the prevention of pesticide drift. The draft PR Notice proposes labeling statements and formats intended to improve communication of drift management requirements to pesticide applicators and as a result, to improve protection of people and other non-target organisms and sites from potential adverse effects that may be caused by off-target pesticide drift. The recommended statements should appear on products whose application may result in drift.

The draft PR Notice contains two types of statements: (1) A general drift statement containing a risk-protective standard which varies according to product type, and (2) examples of

product-specific drift use restrictions, along with a format for presenting these statements on product labeling. The draft PR Notice also informs registrants about the procedures they should use to amend their registrations to adopt these statements. The Agency believes the use of these statements and formats on labels will provide users consistent, understandable, and enforceable directions about how to protect human health and the environment from harm that might result from pesticide drift.

Along with draft PR Notice 2009–X, EPA is issuing for comment a draft “Pesticide Drift Labeling Interpretation” guidance document, which provides guidance to state and tribal officials about how EPA intends the new drift labeling statements to be interpreted, as well as typical examples of how the labeling could be interpreted in real-world spray drift cases.

A supporting document entitled “Draft PR Notice 2009–X: Additional Information and Questions for Commenters” is also being made available in the public docket. This document contains background information on pesticide drift, and a description of current and planned EPA actions to address drift, including the PR Notice, guidance to state enforcement officials on interpreting the new labeling, information on best management practices to reduce drift, and EPA’s drift reduction technology (DRT) project. The document also provides a reader’s guide to the draft PR Notice, including a description of key terms and concepts, explanatory rationales, and specific questions on which EPA is seeking input from stakeholders.

III. Do PR Notices Contain Binding Requirements?

The draft PR Notice discussed in this notice is intended to provide guidance to EPA personnel and decision-makers and to pesticide registrants. While the requirements in the statutes and Agency regulations are binding on EPA and the applicants, the PR Notice is not binding on EPA personnel, pesticide registrants and applicants, or the public. EPA may depart from the guidance where circumstances warrant and without prior notice. Likewise, pesticide registrants may assert that the guidance is not appropriate generally or not applicable to a specific pesticide or situation.

The draft Notice is not intended to limit EPA’s authority under FIFRA to require additional mitigation measures, on a case-by case basis, when appropriate. Nor is it intended to limit the authority of a state or tribe to impose

additional restrictions on the use of a pesticide.
