

provides information about the installation, such as a kiosk that displays information about the solar energy system.

Regarding the novel solar technology, DOE proposes to support projects that introduce new solar technologies that hold the promise of reducing initial costs, simplifying installation, and boosting consumer confidence, but which have little testing to date that demonstrates such improvements. Examples include new cell or module technology, new materials, or innovative installation and mounting techniques. By offering Technical Assistance, DOE envisions helping these new solar technologies develop a performance record in the marketplace, identify technical problems early in mass product releases, and devise solutions and alternatives that move specific solar technologies to cost-competitiveness by 2015.

Regarding the novel solar application, DOE expects to support projects that utilize solar technology in new ways. One example would be to include new methods of building integration beyond traditional roof-mounted modules. DOE also supports innovative designs and methods that open up previously untapped markets or end uses to solar technology adoption. Acceptable applications could also include those that are currently in use in other geographic areas, but not in the vicinity (State, region) of the proposed site.

Regarding replicability, DOE expects to support projects that can either be replicated by the entity requesting the Technical Assistance or by others. The entire project should be replicable, or have replicable components, unless installations are of an extremely large size that justifies DOE support without replicability. Replication of projects is a critical component to advance solar commercialization and will be strongly considered under this opportunity.

Subject to annual Congressional appropriations, the estimated value of the Technical Assistance to be available under this Notice is approximately \$2,000,000 during calendar year 2009.

Although there is no fixed limit on the amount of this annual funding that can be dedicated to Technical Assistance under any one project, individual projects will rarely receive assistance valued at more than \$500,000, unless the proposed project is truly exceptional in how it advances the SAI goal. Technical Assistance may be provided to selected projects until the total Technical Assistance budget has been allocated or all selected projects have received the appropriate amount of Technical Assistance. DOE may choose

to offer a similar opportunity for Technical Assistance in future years.

DOE anticipates entering into 8 to 16 agreements to provide Technical Assistance to selected organizations under this Notice during calendar year 2009. The actual number of agreements will depend on the amount of Technical Assistance required by selected projects and the amount of DOE funding available to support the Technical Assistance.

The period of performance of any individual agreements will be negotiated to accommodate the specific project being supported. Typical projects will range from 18 to 24 months in length.

DOE will provide tailored hands-on Technical Assistance to the selected organization(s) through the use of specifically assembled Technical Assistance Teams. Members of these Teams will be subject matter and technical experts in areas such as architecture, finance, planning, project management, etc. Significant participants of these Teams will be the National Renewable Energy Laboratory (NREL), Sandia National Laboratories (SNL), Oak Ridge National Laboratory (ORNL), the Southwest and Southeast Regional Experiment Stations (RESs), which are housed at New Mexico State University and Florida Solar Energy Center, respectively, as well as CH2M HILL, a global engineering firm selected competitively under a prior DOE procurement. Other entities may be added to the Teams by DOE as necessary. DOE may choose to contract for non-lab Technical Assistance Team members, mainly to provide the non-solar-specific Technical Assistance, through a separate procurement instrument.

Technical Assistance provided under this Notice is designed to help entities make informed decisions. Technical Assistance Teams will provide information and options to enable policy, planning, and purchasing decisions. DOE and the Technical Assistance Teams will not direct behavior or decisions, or require entities to take any particular course of action. The role of DOE stops short of the actual decision-making on projects.

Any legal entity, to include private sector for-profit and non-profit organizations, State and local governments, and trade and other associations may request DOE Technical Assistance under this Notice, as long as the installation proposed by the organization, and for which the Technical Assistance will be provided, is located in the United States.

Federal agencies are not permitted to request Technical Assistance under this Notice.

Federally Funded Research and Development Center (FFRDC) Contractors may not submit a request for Technical Assistance, may not participate as a team partner with any entity requesting Technical Assistance, and may not assist any entity with a request for Technical Assistance under this Notice.

Nonprofit organizations described in section 501(c)(4) of the Internal Revenue Code of 1986 that engaged in lobbying activities after December 31, 1995 are not permitted to submit a request for Technical Assistance under this Notice.

Cities that have been named "Solar America Cities" under a separate DOE award are eligible under this Notice as long as the requested technical assistance is complementary and not duplicative of the technical assistance provided under the Solar America Cities Award Memorandum of Agreement (MOA).

Technical Assistance described under this Notice will be provided via a Memorandum of Agreement (MOA) between DOE, the organization selected to receive the Technical Assistance, and the Technical Assistance Team Leader responsible for providing the Technical Assistance.

A MOA is a collaborative agreement between the Federal Government and other parties to work together on a mutually beneficial activity. The MOA will detail the scope of the Technical Assistance activities, the forms of collaboration, the responsibilities of the partners to the Agreement, and the treatment of any potential intellectual property. Federal funding will not be provided to a partner under a MOA. View the full NOTA at the DOE Industry Interactive Procurement System (IIPS) Web site: <http://e-center.doe.gov/>.

Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern Time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the

Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail FERCOnlineSupport@ferc.gov or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.
