6. White House Central Files, On-the-Shelf Oversize Attachment Files. Volume: 11.8 cubic feet. The White House Central Files Unit was a permanent organization within the White House complex that maintained a central filing and retrieval system for the records of the President and his staff. The On-the-Shelf Oversize Attachment Files were a means of filing and organizing materials that were too bulky or odd-sized to be placed in a regular box. Listed below are the oversize attachments from the White House Central Files, On-the-Shelf Oversize Attachment Files in this opening:

On-the-Shelf OAs (5, 6, 9, 10, 13, 18, 25, 26, 29, 34, 35, 38, 46, 51, 52, 57, 61, 62, 64, 70, 71, 72, 74, 75, 76, 80, 85, 87, 88, 89, 92, 93, 94, 98, 103, 104, 106, 107, 108, 109, 114, 116, 117, 119, 121, 127, 128, 134, 153, 156, 164, 166, 171, 175, 184, 186, 187, 188, 191, 194, 202, 205, 207, 215, 219, 223, 226, 230, 244, 248, 249, 250, 251, 256, 257, 258, 259, 260, 261, 262, 263, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 291, 292, 293, 294, 295, 297, 298, 299, 1883)

7. Exit Interviews. Volume: 0.10 cubic feet. The Office of Presidential Papers and Archives, a unit of the National Archives and Records Service functioning within the White House complex, conducted exit interviews with many departing staff members. These interviews document the staff member's functions and the ways these functions are documented in their records. The following Exit Interviews will be made available: Neal Ball; Frank Gannon; and Ronald H. Walker.

8. White House Communications Agency Sound Recordings. Volume: 12 hours. The White House Communications Agency (WHCA) was a permanent organization within the White House Military Office responsible for preparing audio, motion picture, film and photographic records of White House events. The WHCA Sound Recordings record the public utterances of President Nixon as well as selected speeches and remarks by other members of the Nixon Administration. A number of WHCA Sound Recordings which were previously withheld from public access have been reviewed for release in accordance with 36 CFR 1275.56 (Public Access regulations) and include the following:

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; Request for Comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before January

8, 2010. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

ADDRESSES: You may request a copy of any records schedule identified in this notice by contacting the Life Cycle Management Division (NWML) using one of the following means:

Mail: NARA (NWML), 8601 Adelphi Road, College Park, MD 20740-6001.

E-mail: request.schedule@nara.gov.

FAX: 301-837-3698.

Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

FOR FURTHER INFORMATION CONTACT:

Laurence Brewer, Director, Life Cycle Management Division (NWML), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001. Telephone: 301-837-1539. E-mail: records.mgt@nara.gov.

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

The schedules listed in this notice are media neutral unless specified otherwise. An item in a schedule is media neutral when the disposition instructions may be applied to records regardless of the medium in which the records are created and maintained. Items included in schedules submitted

to NARA on or after December 17, 2007, are media neutral unless the item is limited to a specific medium. (See 36 CFR 1225.12(e).)

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.

NUCLEAR REGULATORY COMMISSION

[NRC-2008-0066; DOCKET NO. 52-017]

Virginia Electric and Power Company D/B/A Dominion Virginia Power and Old Dominion Electric Cooperative Combined License Application for North Anna Unit 3; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from Title 10 of the *Code of Federal Regulations* (10 CFR), Section 50.71(e)(3)(iii) [10 CFR 50.71(e)(3)(iii)], for the North Anna Unit 3 Combined License (COL) Application, Docket Number 52-017, submitted by Virginia Electric and Power Company, doing business as Dominion Virginia Power (Dominion), and Old Dominion Electric Cooperative (ODEC), for the proposed facility to be located in Louisa County, Virginia. In accordance with 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action is a one-time schedule exemption from the requirements of 10 CFR 50.71(e)(3)(iii). During the period from the docketing of a COL application until the Commission makes a finding under 10 CFR 52.103(g) pertaining to facility operation, the applicant must, pursuant to 10 CFR 50.71(e)(3)(iii), submit an annual update to the final safety analysis report (FSAR), a part of the application. The proposed exemption would allow the applicant to submit the FSAR update scheduled for 2009 by June 30, 2010, and to submit the subsequent FSAR update in 2011. The FSAR update schedule could not be changed absent the exemption. The NRC is authorized to grant the exemption pursuant to 10 CFR 50.12. The proposed action is in accordance with the applicant's request dated November 17, 2009 (Agencywide Documents Access and Management

System (ADAMS) Accession No. ML093240090).

Need for the Proposed Action

The proposed action is needed to provide the applicant sufficient time to fully incorporate into the FSAR update the most recent revision (Revision 6) of the Economic Simplified Boiling Water Reactor (ESBWR) Design Control Document (DCD) which was submitted to the NRC on August 31, 2009. The ESBWR design, referenced by the North Anna Unit 3 COL application, is currently undergoing NRC review for design certification and Revision 6 of the DCD was a comprehensive revision. The NRC expectation is that the FSAR update will fully incorporate Revision 6 of the DCD in an acceptable manner. The applicant has requested a one-time exemption from the schedule specified in 10 CFR 50.71(e)(3)(iii) to fully incorporate Revision 6 of the ESBWR DCD into the FSAR update.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that there are no environmental impacts associated with the proposed exemption. The proposed exemption is solely administrative in nature in that it pertains to the schedule for submittal to the NRC of revisions to an application for a COL under 10 CFR Part 52 which has not been granted.

The proposed action will not significantly increase the probability or consequences of accidents. No changes are being made in the types of effluents that may be released offsite. There is no significant increase in the amount of any effluent released offsite. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not have any foreseeable impacts to land, air, or water resources, including impacts to biota. In addition, there are also no known socioeconomic or environmental justice impacts associated with the proposed action. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.
