

effectively respond to licensees with potential challenges.

For materials licensees that have less frequent contact with NRC, the NRC regional offices are establishing an e-mail address that can be used to voluntarily submit the information discussed above. Materials licensees will receive a separate communication, by e-mail or phone, identifying the appropriate e-mail address for submitting information concerning potential pandemic impacts.

NRC recognizes that during a pandemic, licensees' resources may be strained. Therefore, NRC understands that licensees will provide information to the best of their ability, given the circumstances.

Backfit Discussion

This RIS requests that addressees voluntarily provide information as appropriate to assist the NRC staff in managing the impacts of a pandemic on regulated activities. This effort by the NRC is a part of the continuing federal effort in pandemic planning, and it supports situational awareness of potential issues at NRC-licensed facilities.

The staff is not imposing any new positions nor is it imposing any new regulatory requirements on licensees. Any information provided by a licensee is strictly voluntary. No action is required on the part of any licensee; therefore, this document does not constitute a backfit under applicable backfit regulations. Consequently, the staff did not perform a backfit analysis.

Federal Register Notification

To be done after the public comment period.

Paperwork Reduction Act Statement

This RIS does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Existing information collection requirements were approved by the Office of Management and Budget, control numbers 3150-0011 and 3150-0012.

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a current valid Office of Management and Budget control number.

SUPPLEMENTARY INFORMATION: PBGC's regulation on Rules for Administrative Review of Agency Decisions (29 CFR part 4003) prescribes rules governing the issuance of initial determinations by PBGC and the procedures for requesting and obtaining administrative review of initial determinations. Certain types of initial determinations are subject to administrative appeals, which are

covered in subpart D of the regulation. Subpart D prescribes rules on who may file appeals, when and where to file appeals, contents of appeals, and other matters relating to appeals.

Most appeals filed with PBGC are filed by individuals (participants, beneficiaries, and alternate payees) in connection with benefit entitlement or amounts. A small number of appeals are filed by employers in connection with other matters, such as plan coverage under ERISA section 4021 or employer liability under ERISA sections 4062(b)(1), 4063, or 4064. Appeals may be filed by hand, mail, commercial delivery service, fax or e-mail. For appeals of benefit determinations, PBGC has optional forms for filing appeals and requests for extensions of time to appeal.

OMB has approved the administrative appeals collection of information under control number 1212-0061 through January 31, 2010. PBGC intends to request that OMB extend approval of this collection of information for three years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

PBGC estimates that an average of 900 appellants per year will respond to this collection of information. PBGC further estimates that the average annual burden of this collection of information is 0.71 hours and \$52 per appellant, with an average total annual burden of 643 hours and \$46,680.

PBGC is soliciting public comments to—

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Issued in Washington, DC, this 3rd day of December 2009.

John H. Hanley,

Director, Legislative and Regulatory Department, Pension Benefit Guaranty Corporation.

OFFICE OF PERSONNEL MANAGEMENT

[OMB Control No. 3206-0194; Form RI 92-22]

Proposed Collection; Comment Request for an Extension of a Currently Approved Information Collection:

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, May 22, 1995), this notice announces that the Office of Personnel Management (OPM) intends to submit to the Office of Management and Budget (OMB) a request for review of an existing information collection. "Annuity Supplement Earnings Report" (OMB Control No. 3206-0194; Form RI 92-22), is used each year to obtain the earned income of each Federal Employees Retirement System (FERS) annuitant receiving an annuity supplement. The annuity supplement is paid to eligible FERS annuitants who are not retired on disability and are not yet age 62. The supplement approximates the portion of a full career Social Security benefit earned while under FERS and ends at age 62. Like Social Security benefits, the annuity supplement is subject to an earnings limitation.

Comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the Office of Personnel Management, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

We estimate 700 RI 92-22 forms are completed annually. Each form requires approximately 15 minutes to complete. The annual estimated burden is 175 hours.
