

(NEPA) [40 CFR 1506.6(b)] requirements. We completed a thorough analysis of impacts on the human environment, which we included in the draft comprehensive conservation plan and environmental assessment (Draft CCP/EA). The CCP will guide us in managing and administering Mandalay NWR for the next 15 years.

The compatibility determinations for boating, recreational fishing, recreational hunting, wildlife observation/photography, control of mammals (nutria) and alligators, and environmental education/interpretation are available in the CCP.

Background

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–668ee) (Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Administration Act.

Comments

Approximately 100 copies of the Draft CCP/EA were made available for a 30-day public review period as announced

in the **Federal Register** on May 28, 2009 (74 FR 25577). We received 11 comments from local citizens, the Safari Club, the Louisiana Department of Wildlife and Fisheries, and the Louisiana Department of Natural Resources.

Selected Alternative

After considering the comments we received, and based on the professional judgment of the planning team, we selected Alternative B to implement the CCP. The primary focus of the CCP is to optimize migratory bird and resident wildlife habitats. We consider Alternative B to be the most effective for meeting the purposes of the refuge by maintaining and enhancing a diversity of habitats for a variety of fish and wildlife species, enhancing resident wildlife populations, restoring wetlands, and providing opportunities for a variety of compatible wildlife-dependent recreation, education, and interpretive activities.
