List of Subjects in 40 CFR Part 58

Air pollution control, Environmental protection, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: December 23, 2009.

Lisa P. Jackson,
Administrator.

For the reasons stated in the preamble, title 40, chapter I, part 58 of the Code of Federal Regulations is proposed to be amended as follows:

PART 58—[AMENDED]

1. The authority citation for part 58 continues to read as follows:

Authority: 42 U.S.C. 7403, 7410, 7601(a), 7611, and 7619.

Subpart B—[Amended]

2. Section 58.10 is amended by revising paragraph (a)(4) to read as follows:

§ 58.10 Annual monitoring network plan and periodic network assessment.

(a) * * *

(4) A plan for establishing source-oriented lead monitoring sites in accordance with the requirements of appendix D to this part for lead sources emitting 1.0 tpy or greater shall be submitted to the EPA Regional Administrator no later than July 1, 2009, as part of the annual network plan required in paragraph (a)(1) of this section. The plan shall provide for the required source-oriented lead monitoring sites for lead sources emitting 1.0 tpy or greater to be operational by January 1, 2010. A plan for establishing source-oriented lead monitoring sites in accordance with the requirements of appendix D to this part for lead sources emitting greater than 0.50 tpy but less than 1.0 tpy shall be submitted to the EPA Regional Administrator no later than June 30, 2010. The plan shall provide for the required source-oriented lead monitoring sites for lead sources emitting greater than 0.50 tpy but less

than 1.0 tpy to be operational by December 30, 2010.

* * * * *

3. Appendix D to Part 58 is amended as follows:

- a. By revising paragraph 3.(b),
- b. By removing and reserving paragraph 3.(c),
- c. By revising 4.5.(a), and
- d. By revising paragraph 4.5.(b).

Appendix D to Part 58—Network Design Criteria for Ambient Air Quality Monitoring

* * * * *

3. * * *

(b) The NCore sites must measure, at a minimum, PM_{2.5} particle mass using continuous and integrated/filter-based samplers, speciated PM_{2.5}, PM_{10-2.5} particle mass, speciated PM_{10-2.5}, O₃, SO₂, CO, NO/NO_y, lead, wind speed, wind direction, relative humidity, and ambient temperature.

(c) [Reserved.]

* * * * *

4.5 * * * (a) State and, where appropriate, local agencies are required to conduct ambient air lead monitoring near lead sources which are expected to or have been shown to contribute to a maximum lead concentration in ambient air in excess of the NAAQS, taking into account the logistics and potential for population exposure. At a minimum, there must be one source-oriented SLAMS site located to measure the maximum lead concentration in ambient air resulting from each lead source which emits 0.50 or more tons per year based on either the most recent National Emission Inventory (<http://www.epa.gov/ttn/chieff/eiinformation.html>) or other scientifically justifiable methods and data (such as improved emissions factors or site-specific data) taking into account logistics and the potential for population exposure.

(i) One monitor may be used to meet the requirement in paragraph 4.5(a) for all sources involved when the location of the maximum lead concentration due to one lead source is expected to also be impacted by lead emissions from a nearby source (or multiple sources). This monitor must be sited, taking into account logistics and the potential for population exposure, where the lead concentration from all sources combined is expected to be at its maximum.

(ii) The Regional Administrator may waive the requirement in paragraph 4.5(a) for monitoring near lead sources if the state or, where appropriate, local agency can demonstrate the lead source will not contribute to a maximum lead concentration in ambient air in excess of 50 percent of the NAAQS (based on historical monitoring data, modeling, or other means). The waiver must be renewed once every 5 years as part of the network assessment required under § 58.10(d).

(b) State and, where appropriate, local agencies are required to conduct non-source-

oriented lead monitoring at each NCore site required under paragraph 3 of this appendix.
