Title: NESHAP for Asbestos (Renewal).

ICR Numbers: EPA ICR Number 0111.12, OMB Control Number 2060-0101.

ICR Status: This ICR is schedule to expire on April 30, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for asbestos were proposed on January 10, 1989, and promulgated on November 20, 1990 (55 FR 48414).

These standards apply to the following affected facilities: demolition and renovation of facilities; the disposal of asbestos waste; asbestos milling, manufacturing and fabricating; the use of asbestos on roadways; asbestos waste conversion facilities; and the use of asbestos insulation and sprayed-on materials. This information is being collected to assure compliance with 40 CFR part 61, subpart M.

The monitoring, recordkeeping, and reporting requirements outlined in these rules are similar to those required for other NESHAP regulations. Consistent with the NESHAP General Provisions (40 CFR part 63, subpart A), respondents are required to submit initial notifications conduct performance tests, and submit semiannual reports. They are also required to maintain records of applicability determinations; performance test results; exceedances; periods of startup, shutdown, or malfunction; monitoring records; and all other information needed to determine compliance with the applicable standard, such as records of visible emissions monitoring at potential sources of asbestos and of inspection records of air cleaning devices to ensure proper operation.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 61, subpart M, as authorized in sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA regulations listed in 40 CFR part 9 and 48 CFR chapter 15, are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information estimated to average two hours per response.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time

needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of asbestos milling, manufacturing, fabricating, waste disposal, and waste conversion facilities

Estimated Number of Respondents: 9,432

Frequency of Response: On occasion, initially and semiannually

Estimated Total Annual Hour Burden: 229,381

Estimated Total Annual Cost: \$18,517,636, inclusive of Labor costs. There are no capital/startup or O&M costs associated with this ICR.

Changes in the Estimates: There is no change in the labor hours or burden cost (capital startup/O&M expenses) in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. It should be noted that there is minor correction to the labor hour cost due to rounding errors in the previous ICR.

Since there are no changes in the regulatory requirements and there is no significant industry growth, the labor hours and cost figures in the previous ICR are used in this ICR and there is no change in burden to industry.

Dated: February 10, 2009.

John Moses,

Acting-Director, Collection Strategies Division.
