

- Leads to the creation/retention of good jobs for the community. This is defined as greater than or equal to the average wage in the county. The Bureau of Labor Statistic's Web site at <http://www.bls.gov/data/#wages> has data available for this analysis.

- Leverages public-private partnerships, for example, as evident by private sector involvement and/or private sector funding in the project.

- Evidences best-practices in project management, for example, by demonstrating a feasible, cost-effective budget and a specific, deadline driven project timeline.

4. *Investments that Support Regionalism, Innovation, and Entrepreneurship (20%)*. Priority will be given to an application that strengthens regional cluster strategies and supports innovation and entrepreneurship, as indicated by the extent to which the investment:

- Builds upon or extends existing planning documents, such as a CEDS, or other Federal, State, regional, or local development plans.

- Links clearly to a leading or emerging regional cluster. This may be measured by the extent the investment supports an industry that has a location quotient greater than one. Applicants may find more information on location quotients at the Bureau of Labor Statistic's site at http://data.bls.gov/LOCATION_QUOTIENT/servlet/lqc.ControllerServlet. This also may be demonstrated by:

- A geographic concentration of an industry compared to the State or nation;
- Increasing regional employment in that industry; or
- Increasing numbers of firms in the relevant cluster.

- Fosters commercialization in technology. This could be shown by increasing technology transfer at an institution of higher education or spinning off new technology, etc.

5. *Investments that Support Global Trade/Competitiveness (15%)*. Priority will be given to an application that supports global trade and competitiveness, as indicated by the extent to which the investment:

- Supports existing "high growth/high potential companies" or those that have the ability to create "high growth/high potential companies," which are defined as companies with fewer than 500 employees whose sales doubled in four years or less; or

- Supports businesses or clusters with significant export potential.

6. *Investments that grow the "Green Economy" (5%)*. Priority will be given to an application whose objectives support

the "green economy." Such projects would:

- Promote renewable energy, energy efficiency, and/or reuse, recycling, or restoration that result in a green end-product (for example, a renewable energy commercialization center);

- Green an existing process or function (for example, implementing sustainable manufacturing practices); or
- Result in a green building (for example, a structure certified under the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) system).

Applications will be evaluated to the extent they produce identified green project benefits; for example renewable energy capacity per year, carbon emission offsets, overall energy savings, or third-party verified green building certifications.
