The network computers are located in secured areas, and they are protected by the FCC's security protocols, which include controlled access, passwords, and other security features. Information resident on the database servers is backed-up routinely onto magnetic media. Back-up tapes are stored on-site and at a secured, off-site location.

**RETENTION AND DISPOSAL:**

The information in the RARS information system is maintained for 11 years after an individual ceases to be a user of the system. The electronic records, files, and data are destroyed physically (electronic storage media) or by electronic erasure.
