

encourages you to send your comments concerning the proposed action, possible mitigation measures, and any other information relevant to the proposal.

Any persons wanting to be added to a mailing list of interested parties can call or write to Forest Service, as described in this notice. Additional announcements will be made by news release to the Bozeman Daily Chronicle and other media outlets. Scoping meetings were held last spring and summer. No additional meetings are planned. All comments received by the Forest Service during the scoping comment period in March/April 2009 and the follow-up meetings will be considered and are part of the record for this EIS. You are encouraged to submit additional issues but there is no need to resubmit previously submitted comments or concerns. All comments will be considered in the EIS.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). 5

Because of these court rulings, it is very important that those interested in this proposed action participate during comment periods provided so that substantive comments and objections are made available to the Forest Service at a time when they can meaningfully consider them. To assist the Forest Service in identifying and considering issues, comments should be specific to concerns associated with the upgraded 161-kV transmission line. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in structuring comments.
