

or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Taconite iron ore processing plants.

Estimated Number of Respondents: 8.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 651.

Estimated Total Annual Cost:

\$1,012,546, which includes \$754,946 in labor costs, no capital/startup costs, and \$257,600 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an increase of 243 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred due to an incorrect calculation of the number of responses in the previous ICR. The existing eight respondents are subject to performance testing twice every five years, or 3.2 respondents per year and was changed from 1.6 respondents per year. The increase in labor costs was also due to an increase in labor rates.

Director, Collection Strategies Division.

Notice

In accordance with Section 309(a) of the Clean Air Act, EPA is required to make its comments on EISs issued by other Federal agencies public.
