Any person may, within 60 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention. Any person filing to intervene or the Commission's staff may, pursuant to section 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) (18 CFR 157.205) file a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (<http://www.ferc.gov>) under the "e-Filing" link.

Title: NESHAP for Boat Production (Renewal).

ICR Numbers: EPA ICR Number 1966.04, OMB Control Number 2060-0546.

ICR Status: This ICR is schedule to expire on September 30, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Boat Manufacturing (40 CFR part 63, subpart VVVV) were proposed on July 14, 2000, and promulgated on August 22, 2001.

This regulation covers resin and gel coat operations at fiberglass boat manufacturers, paint and coating operations at aluminum boat manufacturers, and carpet and fabric adhesive operations at all boat manufacturers. Owners or operators of boat manufacturing facilities are required to submit initial notification, performance tests, and periodic reports. Respondents are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Semiannual reports are also required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NESHAP.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements,

maintain reports and records.

Performance tests reports are required as this is the Agency's record of a source's initial capability to comply with the emission standard, and serve as a record of the operating conditions under which compliance were achieved.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart VVVV as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions date and other information that have been determined to be private.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information are estimated to average 81 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining, information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Boat manufacturing.

Estimated Number of Respondents: 144.

Frequency of Response: Initially, quarterly, and semiannually.

Estimated Total Annual Hour Burden: 23,543.

Estimated Total Annual Cost: \$2,227,693 which includes \$2,226,893 in labor costs, no capital/startup costs, and \$800 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is a decrease of 2,784 hours in this ICR as compared to the previous one. There is a difference of 159 responses as compared to the previous ICR of 448. This shift is attributed to the fact that initial notification for existing sources has already been achieved.

Dated: July 6, 2010.

Director, Collection Strategies Division.

Clean Water Act Section 312(b): Notice Seeking Stakeholder Input on Petition and Other Request To Revise the Performance Standards for Marine Sanitation Devices

AGENCY: Environmental Protection Agency.

ACTION: Notice of petition and other request for rulemaking; request for comments.

SUMMARY: This action notifies the public that the Environmental Protection Agency (EPA or "the Agency") has received a petition for rulemaking from Friends of the Earth (FOE) and another separate request for rulemaking under section 312 of the Clean Water Act (CWA). In general these rulemaking-related requests ask EPA to revise its regulations establishing performance standards for vessel sewage treatment devices under the CWA. The rulemaking petition from FOE also requests that EPA establish monitoring, recordkeeping and reporting requirements under the CWA to ensure compliance with the performance standards. EPA has not made a decision on whether to grant or deny the rulemaking requests, nor is the Agency proposing any changes to the performance standards or other provisions of its regulations at this time. Rather, the purpose of today's Notice is simply to make the public aware of the issues raised in the requests for rulemaking and to obtain the public's input, in the form of comment and relevant information, to help EPA determine appropriate action in response to each of these requests. In particular, EPA seeks input regarding: The universe of vessels operating on navigable waters that use sewage treatment devices; technical information on the performance, effectiveness and costs of vessel sewage treatment devices, including performance testing data; suggestions on what, if any, changes to the performance standards might be appropriate; and information on monitoring, recordkeeping and reporting approaches for vessel sewage discharges.

DATES: Comments must be received on or before November 9, 2010.
