SUPPLEMENTARY INFORMATION: The U.S. Department of Energy (DOE) initiated a rulemaking to consider establishing new energy conservation standards or energy use standards for furnace fans on June 3, 2010 by publishing a notice in the Federal Register (75 FR 31323). The notice informed interested parties of the availability of a framework document that detailed the expected analytical approach and scope of coverage for the rulemaking, and identified several issues on which DOE is particularly interested in receiving comment. DOE held a public meeting on June 18, 2010 to discuss and receive comments on its analytical approach and associated issues. (A transcript of the public meeting is currently available on the DOE Web page at the following URL: http://www.eere.energy.gov/buildings/ appliance standards/residential/ furnace fans framework.html) DOE announced in the Federal Register notice and at the public meeting that it

would accept written comments through July 6, 2010.

The Air-Conditioning, Heating, and Refrigeration Institute (AHRI) requested an extension of the time to submit comments. In its request, AHRI stated that because many AHRI members will be attending the ASHRAE meetings, and considering the 4th of July holiday, industry would not have adequate time to appropriately respond to all the questions and issues raised by DOE in the framework document.

Based on the number and scope of questions and issues raised in the DOE framework document (and during the public meeting), DOE believes that reopening the comment period to allow additional time for interested parties to submit comments is appropriate. Therefore, DOE is reopening the comment period until July 27, 2010 to provide interested parties additional time to prepare and submit comments. DOE will accept comments received no later than July 27, 2010 and will consider any comments received between July 6, 2010 and July 27, 2010 to be timely filed.

Issued in Washington, DC, on July 8, 2010. Cathy Zoi,

Assistant Secretary, Energy Efficiency and Renewable Energy.
