Title: Emission Control System Performance Warranty Regulations and Voluntary Aftermarket Part Certification Program (Renewal).

ICR numbers: EPA ICR No. 0116.09, OMB Control No. 2060-0060.

ICR Status: This ICR is scheduled to expire on August 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the

related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Under Section 206(a) of the Clean Air Act (42 U.S.C. 7521), on-highway engine and vehicle manufacturers may not legally introduce their products into U.S. commerce unless EPA has certified that their production complies with applicable emission standards. Per section 207(a), original vehicle manufacturers must warrant that vehicles are free from defects in materials and workmanship that would cause the vehicle not to comply with emission regulations during its useful life. Section 207(a) directs EPA to provide certification to those manufacturers or builders of automotive aftermarket parts that demonstrate that the installation and use of their products will not cause failure of the engine or vehicle to comply with emission standards. An aftermarket part is any part offered for sale for installation in or on a motor vehicle after such vehicle has left the vehicle manufacturer's production line (40 CFR 85.2113(b)). Participation in the aftermarket certification program is voluntary. Aftermarket part manufacturers or builders electing to participate conduct emission and durability testing as described in 40 CFR part 85, subpart V, and submit data about their products and testing procedures.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 547 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Importers (including Independent Commercial Importers) of light duty vehicles or engines, light duty trucks or engines, and highway motorcycles or engines.

Estimated Number of Respondents: 1.
Frequency of Response: On occasion.
Estimated Total Annual Hour Burden: 547.

Estimated Total Annual Cost:
 \$19,063, including \$1,955 annualized capital and O&M costs.

Changes in the Estimates: There is an increase of \$420 in the annual cost burden currently identified in the OMB Inventory of Approved ICR Burdens. This reflects the most recent estimates for similar O&M and capital cost elements in ICRs developed since the last renewal. There is no change in the hour burden.

Dated: August 18, 2010.
