Registration is required to authenticate users that plan to access e-services products. This system is a necessary outgrowth of advanced information and communication technologies. TIN Matching is one of the products available through e-Services offered via the Internet and accessible through the irs.gov Web site. TIN Matching allows a payer, or their authorized agent, who is required to file information returns for income subject to backup withholding to match TIN/Name combinations through interactive and bulk sessions. It is necessary for payers to apply online to use TIN Matching, and the information requested in the application process is used to validate them systemically as payers of the correct types of income.
