

a vast expanse of desert lands that represent a combination of Great Basin, Sonoran, and Mojave desert ecosystems. The Act also specified hunting as a permitted activity within the Preserve. By the time of establishment, many artificial water sources had been developed within the Preserve to support cattle grazing operations and game populations. Human manipulation of natural springs and seeps, with intermittent maintenance, enhanced surface flow to provide additional water for the same purposes. There also existed 133 small game wildlife water developments (also known as "guzzlers" or "drinkers"), and 6 big game guzzlers, which intercept and store rainwater for wildlife use. All of the big game guzzlers and many of the small game water developments are in areas of the Preserve which are now designated Wilderness.

Since 1998, private donors have purchased and retired approximately 1,260,980 acres of grazing land in the Preserve. As cattle have been removed, watering troughs, windmills, and pipelines were also removed or fell into disrepair. This has led to calls by some hunting proponents to convert abandoned wells to game guzzlers. Conversely, wildlife advocates have cited guzzler-related injuries to bighorn sheep, protected desert tortoises, and other wildlife species as a rationale for reducing the number of water developments.

Since 1994, the NPS has managed water sources in the Preserve on a case-by-case basis, while conducting inventories and studies to develop the information needed for an ecosystem-scale management approach. The Preserve's general management plan (GMP) identified the need to develop a comprehensive ecosystem-scale Water Resources Management Plan for springs, seeps, water diversions, and artificial water sources to maintain healthy wildlife communities and groundwater flow conditions at safe yields—this conservation planning effort seeks to fulfill that objective. Desired future condition goals will be developed through public engagement with hunting groups, environmental organizations, park visitors, local, state and Federal agencies, and other interested parties, in keeping with existing laws, regulations, and NPS management policies.

Surface water availability in the form of springs and seeps is a function of groundwater flow and discharge. The relationship between groundwater, surface water, and wells is complex. Preserve stewardship and resource management activities must be guided

by general principles that can be applied to specific problems. Developing and clearly explaining how these principles should be applied is a goal of the Draft WRMP/EIS. The relationship between surface water availability and wildlife populations is also multifaceted, and may be complicated by the potential effects of climate change. The Draft WRMP/EIS will provide the basis for preserving wildlife and preventing resource impairment.

DATES: To facilitate sound planning and consideration of environmental resources, the NPS intends to gather information necessary for preparing the Draft WRMP/EIS and to obtain suggestions from the public on issues and concerns which should be addressed. The NPS is seeking pertinent environmental information regarding scope of the analysis, and suggestions regarding preliminary alternatives which should be considered. All comments must be postmarked or transmitted not later than July 11, 2011. Full public participation by park stakeholders, concerned organizations and private citizens, as well as Federal, State, and local agencies, is invited so as to fully inform the process of preparing the Draft WRMP/EIS. Four public meetings will be hosted during the scoping period: June 27 (Henderson, NV), June 28 (Needles, CA), June 29 (San Bernardino, CA), and June 30 (Barstow, CA). Confirmed details on time and location will be announced in the local press and on the park Web site (<http://www.nps.gov/moja>); details may also be obtained by contacting the Preserve directly. These meetings will provide current information and respond to questions and comments on issues and alternatives to assist NPS in developing the Draft WRMP/EIS.

SUPPLEMENTARY INFORMATION: Periodically updated information will be available on the project Web site at http://parkplanning.nps.gov/mojave_water. You may request to be added to the project mailing list by mailing, e-mailing, or faxing your request to: Superintendent, Mojave National Preserve, Attn: Mojave WRMP, 2701 Barstow Road, Barstow, California 92311 (E-mail: MOJA_Superintendent@nps.gov and Fax: (760) 252-6171). Please note in your request whether you wish to receive a printed or compact disk version of the Draft WRMP/EIS, or just wish to receive notice that the document is available for review.

If you wish to comment during the scoping phase for the Draft WRMP/EIS, you may use any one of several methods. To comment electronically,

submit your comments online by visiting the project Web site http://parkplanning.nps.gov/mojave_water. If you wish to submit written comments (e.g., in a letter), you may send your comments via U.S. Postal Service (or other mail delivery service) or hand-deliver them to the address provided above. Oral statements and written comments will also be accepted during public meetings. Comments will not be accepted by fax, e-mail, or in any other way than those specified above. Comments in any format (hard copy or electronic) submitted by an individual or organization on behalf of another individual or organization also will not be accepted.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Decision Process: Following careful analysis of all responses received concerning the Draft WRMP/EIS, a final plan will be prepared and its availability similarly announced in the **Federal Register**. Thereafter, but not sooner than 30 days after release of the Final WRMP/EIS, a Record of Decision would be prepared. As a delegated EIS, the official responsible for final approval of the Water Resources Management Plan is the Regional Director, Pacific West Region. Subsequently the official responsible for implementation of the approved plan would be the Superintendent, Mojave National Preserve.

Dated: February 10, 2011.

Patricia L. Neubacher,
Acting Regional Director, Pacific West Region.

National Register of Historic Places; Notification of Pending Nominations and Related Actions

Nominations for the following properties being considered for listing or related actions in the National Register were received by the National

Park Service before April 23, 2011. Pursuant to section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation. Comments may be forwarded by United States Postal Service, to the National Register of Historic Places, National Park Service, 1849 C St., NW., MS 2280, Washington, DC 20240; by all other carriers, National Register of Historic Places, National Park Service, 1201 Eye St., NW., 8th floor, Washington, DC 20005; or by fax, 202-371-6447. Written or faxed comments should be submitted May 26, 2011. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

BILLING CODE 4312-51-P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

Notice of Proposed Information Collection

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice and request for comments for 1029-0118.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the Office of Surface Mining Reclamation and Enforcement (OSM) is announcing its intention to request continued approval for the collection of information which relates to a citizen's written request for a Federal inspection.

DATES: Comments on the proposed information collection must be received by July 11, 2011, to be assured of consideration.

ADDRESSES: Comments may be mailed to John Trelease, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Ave, NW., Room 202—SIB, Washington, DC 20240. Comments may also be submitted electronically to jtrelease@osmre.gov.

FOR FURTHER INFORMATION CONTACT: To receive a copy of the information collection request contact John Trelease at (202) 208-2783 or by e-mail at jtrelease@osmre.gov.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget (OMB) regulations at 5 CFR 1320, which implement provisions of the Paperwork Reduction Act of 1995 (Pub. L 104-13), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities [see 5 CFR 1320.8 (d)]. This notice identifies information collection that OSM will be submitting to OMB for approval. This collection is contained in 30 CFR 842, Federal inspections and monitoring. OSM has revised burden estimates, where appropriate, to reflect current reporting levels or adjustments based on reestimates of burden or respondents. OSM will request a 3-year term of approval for this information collection activity.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for 30 CFR 842 is 1029-0118.

Comments are invited on: (1) The need for the collection of information for the performance of the functions of the agency; (2) the accuracy of the agency's burden estimates; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the information collection burden on respondents, such as use of automated means of collection of the information. A summary of the public comments will accompany OSM's submission of the information collection request to OMB.

Before including your address, phone number, e-mail address, or other
