SUPPLEMENTARY INFORMATION: MSHA regulations provide that, generally, whenever respiratory equipment is used, metal and nonmetal mine operators institute a respirator program governing selection, maintenance, training, fitting, supervision, cleaning, and use of respirators. These regulations seek to control miner exposure to harmful airborne contaminants by using engineering controls to prevent contamination and vent or dilute the contaminated air. The regulations include information collections related to the development of a respirator program that addresses the selection, use, and care of respirators; fit-testing records used to ensure that a respirator worn by an individual is the same brand, model, and size respirator that was worn when that individual successfully passed a fit-test; and records kept of inspection dates and findings for respirators maintained for emergency use. The mine operator uses the information to issue proper respiratory protection to miners when feasible engineering and/or administrative controls do not reduce miners' exposures to permissible levels. The MSHA uses the information to determine compliance with the standard.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid OMB control number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under OMB Control Number 1219-0048. The current OMB approval is scheduled to expire on May 31, 2011; however, it should be noted that information collections submitted to the OMB receive a month-

to-month extension while they undergo review. For additional information, see the related notice published in the **Federal Register** on January 19, 2011 (76 3175).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to ensure appropriate consideration, comments should reference OMB Control Number 1219–0048. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

SUPPLEMENTARY INFORMATION: Regulations 30 CFR 56.19057 and 57.19057 require the annual examination and certification of hoist operators' fitness by a qualified, licensed physician that includes documentation and recordkeeping requirements. The safety of all metal and nonmetal miners riding hoist conveyances is largely dependent upon the attentiveness and physical capabilities of the hoist operator. Improper movements, over-speed, and over-travel of a hoisting conveyance can

result in serious physical harm or death to all passengers.
