

Historic and cultural resources: Potential impacts related to site development and the associated linear facilities (e.g., pipelines);

Geology: Potential impacts from the injection and storage of CO₂ on underground resources such as ground water supplies, mineral resources, and fossil fuel resources, and the fate and stability of CO₂ being stored;

Health and safety issues: Potential impacts associated with use, transport, and storage of hazardous chemicals, as well as CO₂ capture and transport to the sequestration site;

Socioeconomics: Potential impacts to schools, housing, public services, and local revenues, including the creation of jobs;

Environmental justice: Potential for disproportionately high and adverse impacts on minority and low-income populations;

Noise and light: Potential disturbance impacts from construction, transportation of materials, and facility operations;

Connected actions: Potential impacts from the integrated operations of the oxy-combustion project and sequestration project, as well as potential development of support facilities or supporting infrastructure;

Cumulative effects that could result from the incremental impacts of the proposed project when added to other past, present, and reasonably foreseeable future actions;

DOE will also address compliance with regulatory and environmental permitting requirements and environmental monitoring plans associated with the carbon capture facility and CO₂ geologic storage activities.

Public Scoping Process

This Notice of Intent initiates the scoping process under NEPA, which will guide the development of the Draft EIS. To ensure identification of issues related to DOE's proposed action with respect to the proposed FutureGen 2.0 program, DOE seeks public input to define the scope of the EIS. The public scoping period will end June 22, 2011. Interested government agencies, Native American Tribes, private-sector organizations, and the general public are encouraged to submit comments or suggestions concerning the content of the EIS, issues and impacts that should be addressed, and alternatives that should be considered. Scoping comments should clearly describe specific issues or topics that the EIS should address. Written, e-mailed, or faxed comments should be received by June 22, 2011 (see **ADDRESSES**). DOE will

consider late comments to the extent practicable.

DOE will conduct public scoping meetings according to the following schedule:

June 7, 2011—Taylorville High School, 815 W. Springfield Road, Taylorville, IL 62568.

June 8, 2011—Ironhorse Golf Club, 2000 Ironhorse Drive, Tuscola, IL 61953.

June 9, 2011—The Jacksonville Elks Lodge, 231 West Morgan Street, Jacksonville, IL 62650.

Each public scoping meeting will include an informal session from 5 to 7 p.m., followed by a formal presentation at 7 p.m.

Oral comments will be heard during the formal portion of the scoping meetings. The public is also invited to learn more about the project at an informal session at each location. DOE requests that anyone who wishes to speak at the public scoping meetings should contact Mr. Whyte, either by phone, e-mail, fax, or postal mail (see **ADDRESSES**).

Those who do not arrange in advance to speak may register at the meeting (preferably at the beginning of the meeting) and would be given an opportunity to speak after previously scheduled speakers. Speakers will be given approximately five minutes to present their comments. Those speakers who want more than five minutes should indicate the length of time desired in their request. Depending on the number of speakers, DOE may need to limit all speakers to five minutes initially and provide additional opportunity as time permits. Individuals may also provide written materials in lieu of, or supplemental to, their presentations. DOE will give equal consideration to oral and written comments.

DOE will begin the formal meeting with an overview of the proposed FutureGen 2.0 program. The meeting will not be conducted as an evidentiary hearing, and speakers will not be cross-examined. However, speakers may be asked questions to help ensure that DOE fully understands the comments or suggestions. A presiding officer will establish the order of speakers and provide any additional procedures necessary to conduct the meeting. A stenographer will record the proceedings, including all oral comments received.

Issued in Washington, DC, this 18th day of May 2011.

Charles D. McConnell,
Chief Operating Officer, Office of Fossil Energy.
