Comments

A 60-day public comment Notice was published in the **Federal Register** on February 18, 2011. This comment period ended April 19, 2011. Three public comments were received from this notice that all dealt with the budget for program grants, and asked that line items being removed from the existing budget instructions be retained. The decision to remove those line items (such as supplies) stands based on General Counsel's interpretation of our legislation. Additional comments were made regarding the lack of definitions for questions/categories in our online help system. The online help system will be reviewed and descriptive text added. Description: The Corporation is seeking approval of its AmeriCorps VISTA Concept Paper, Application and Budget Instructions, Project Progress Report (PPR) and Progress Report Supplement (VPRS) which are used by potential and current AmeriCorps VISTA sponsors. The Corporation is proposing to merge two current information collection requests into one information collection request consisting of four instruments.

The information collection will otherwise be used in the same manner

as the currently approved information collection requests. The Corporation also seeks to continue using the current information collections until the renewal is approved by OMB. The current information collection requests are due to expire on May 11, 2011 and September 30, 2011.

Office of Planning, Evaluation and Policy Development

Type of Review: New.

Title of Collection: Evaluation of the Effectiveness of Online Learning Courses for Secondary Students.

OMB Control Number: 1875-NEW.

Agency Form Number(s): N/A.

Frequency of Responses: Once.

Affected Public: Individuals or households.

Total Estimated Number of Annual Responses: 1,761.

Total Estimated Number of Annual Burden Hours: 220.

Abstract: Given the considerable scale at which online learning is being used in schools today, it is particularly important that policymakers have research-based guidance available about how best to deploy online learning activities. However, few rigorous studies have been completed that compare K–12 student achievement in online learning to traditional, classroom-based education. Similarly, while many articles provide advice regarding the “best” ways to implement online learning, few report an empirical basis for recommended practices. To fill this critical gap in knowledge, this study will provide rigorous empirical data on the effectiveness of online learning for secondary students. This study will conduct surveys of teachers and students engaged in online learning courses in two states: Florida and North Carolina. Both states have large-scale, statewide virtual school providers. In Florida, the impact of a game-based, online U.S. History course offered by the Florida Virtual School (FLVS) on student learning will be compared to a traditional FLVS U.S. History online course using an experimental design, randomly assigning students to conditions. Learning outcomes will be assessed at the end of two topical units—Civil Rights and the Industrial Revolution. In North Carolina, the impact of online learning for secondary students enrolled in five different

courses offered by the North Carolina Virtual Public School will be compared with peers enrolled in similar courses in face-to-face instruction. The North Carolina study will use a quasi-experimental design using propensity score matching. State end-of-course exams for each course and the scores on the Advanced Placement U.S. History exam will be used as the primary outcome measures. In addition to the surveys of online teachers and students, a sample of North Carolina teachers teaching similar courses in face-to-face instruction will be administered a survey to collect information on instructional practices in the comparison face-to-face courses.
