SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing a revision to an existing guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

Proposed revision 1 of Regulatory Guide 8.2, "Administrative Practices in Radiation Surveys and Monitoring," was issued with a temporary identification as Draft Regulatory Guide, DG-8035 on August 30, 2010 (75 FR 52996). This guidance sets forth the NRC staff's views of acceptable administrative practices associated with surveys and monitoring of radiation arising from NRC licensed activities. This guidance is intended primarily for NRC licensee administrative and management personnel that are involved in, or are planning to initiate, activities involving the handling of radioactive materials or exposure to radiation.

The administrative requirements for surveys and monitoring of radiation are specified in Title 10, of the *Code of Federal Regulations*, part 20, "Standards for Protection against Radiation" (10 CFR part 20), and are applicable to all NRC-licensed activities. Part 20 requires surveys in order to evaluate the significance of radiation levels that may be present. In addition, part 20 requires radiation monitoring in order to obtain measurements for the evaluation of potential exposures and doses.

II. Further Information

On August 30, 2010, DG-8035 was published with a request for public comments (75 FR 52996). The public comment period closed on October 29, 2010. The regulatory analysis may be found in ADAMS under Accession No. ML110460099. Staff's responses to public comments on DG-8035 are available under ML110460108.

In addition, regulatory guides are available for inspection at the NRC's

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Abstract: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: the target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

The Peace Corps received no comments in response to the 60-day
