**SUPPLEMENTARY INFORMATION:**

Summaries for each FAR rule follow.  
For the actual revisions and/or  
amendments made by these FAR cases,  
refer to the specific item numbers and  
subject set forth in the documents  
following these item summaries. FAC  
2005–52 amends the FAR as specified  
below:

**Item I—Sustainable Acquisition (FAR  
Case 2010–001) (Interim)**

This interim rule amends the FAR to  
implement Executive Order 13514,  
Federal Leadership in Environmental,  
Energy, and Economic Performance, and  
Executive Order 13423, Strengthening  
Federal Environmental, Energy, and  
Transportation Management. It requires  
Federal agencies to leverage agency  
acquisitions to foster markets for  
sustainable technologies, materials,  
products, and services. Federal agencies  
are additionally required to implement  
high-performance sustainable building  
design, construction, renovation, repair,  
commissioning, operation and  
maintenance, management, and  
deconstruction practices in applicable  
acquisitions. Contractors will be  
required to support the goals of an  
agency’s environmental management  
system.

**Item II—Contract Closeout (FAR Case  
2008–020)**

This final rule amends the FAR  
procedures for closing out contracts. A  
proposed rule was published August 20,

2009. This rule revises procedures and  
sets forth a timeframe for clearing final  
patent reports; updates quick-closeout  
procedures, including applicable  
thresholds; sets forth a description of an  
adequate final indirect cost rate  
proposal and supporting data; and adds  
language for withholding fees to protect  
the Government’s interest and  
encourage timely submissions of an  
adequate final indirect cost rate  
proposal. The rule does not impose any  
additional requirements on small  
businesses.

**Item III—Prohibition on Contracting  
With Inverted Domestic Corporations  
(FAR Case 2008–009)**

This final rule implements section  
740 of Division C of the Consolidated  
Appropriations Act, 2010 (Pub. L. 111–  
117) and similar restrictions in 2008 and  
2009 appropriations acts, which  
prohibit the award of contracts using  
appropriated funds to any foreign  
incorporated entity that is treated as an  
inverted domestic corporation or to any  
subsidiary of one, except as permitted in  
specific exceptions as set forth in the  
rule. The rule does not impose any  
requirements on small businesses.

**Item IV—Buy American Exemption for  
Commercial Information Technology—  
Construction Material (FAR Case 2009–  
039)**

This rule adopts as final, without  
change, an interim rule. The interim  
rule amended the FAR to implement

section 615 of Division C, Title VI, of  
the Consolidated Appropriations Act,  
2010 (Pub. L. 111–117). Section 615  
authorizes exemption from the Buy  
American Act for acquisition of  
information technology that is a  
commercial item.

**Item V—Oversight of Contractor Ethics  
Programs (FAR Case 2010–017)**

This final rule modifies FAR 42.302,  
Contract Administration Functions, to  
add to the list of contract administration  
functions, the function of ensuring that  
contractors have implemented FAR  
52.203–13, Contractor Code of Business  
Ethics and Conduct.

Contracting officers may ask to see a  
contractor’s code of ethics or a  
contractor’s ethics program, but the  
contracting officer is not required to ask  
for a copy of any documents.

**Item VI—Technical Amendments**

Editorial changes are made at FAR  
52.212–3, 53.301–1447, 53.301–1449,  
and 52.302–347.

Dated: May 18, 2011.

### SUPPLEMENTARY INFORMATION:

#### I. Background

In the face of changing environmental circumstances and our Nation's heightened energy demands, the Federal Government must lead by example to create a clean energy economy that will increase prosperity, promote energy security, protect the interests of taxpayers, and safeguard the health of our environment. Executive Order 13514 (E.O. 13514), Federal Leadership in Environmental, Energy, and Economic Performance, was signed on October 5, 2009 (74 FR 52117, October 8, 2009). It requires Federal agencies to leverage agency acquisitions to foster markets for sustainable technologies and materials, products, and services. The head of each agency shall advance

sustainable acquisition by ensuring that 95 percent of new contract actions, including task and delivery orders, for products and services, with the exception of acquisition of weapon systems, are energy-efficient (Energy Star or Federal Energy Management Program (FEMP)-designated), water-efficient, biobased, environmentally preferable (e.g., Electronic Product Environmental Assessment Tool (EPEAT)-registered), non-ozone depleting, contain recycled content, or are non-toxic or less toxic alternatives, where such products and services meet agency performance requirements. Federal agencies are also required to design, construct, maintain and operate high-performance sustainable buildings in sustainable locations.

Similarly, recognizing the long-term impact that Federal environmental management can have on national health and security, Executive Order 13423 (E.O. 13423), Strengthening Federal Environmental, Energy, and Transportation Management, was signed on January 24, 2007 (72 FR 3919, January 26, 2007). E.O. 13423 establishes the policy that Federal agencies shall conduct their environmental, transportation, and energy-related activities in an environmentally, economically, and fiscally sound, integrated, continuously improving, efficient, and sustainable manner.

The authorities throughout the applicable FAR parts are updated to include E.O. 13423 and E.O. 13514. Additionally, authorities throughout the applicable FAR parts are updated to delete references to E.O. 13101, E.O. 13123, and E.O. 13148, because the Executive orders were revoked by E.O. 13423.

Under FAR part 2, the definitions for “renewable energy” and “United States” are revised to reflect the latest definitions of the terms in E.O. 13514. A new definition for “sustainable acquisition,” derived from the definition of “sustainable” in E.O. 13514, is added to FAR part 2. The definition of “water consumption intensity” is also added to FAR part 2 from E.O. 13514.

FAR part 4 changes include revisions to the policy for contractor submission of paper documents to the Government and updating the general description of the Federal Procurement Data System (FPDS). In efforts to reduce or prevent waste and meet the intent of the agencies' requirement to purchase at least 30 percent postconsumer fiber content paper as directed in both E.O. 13423 and E.O. 13514, contractors are required, if not using electronic commerce methods, to submit paper
