

FOR FURTHER INFORMATION CONTACT:

Benish Shah, Office of Managing Director, (202) 418-7866.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0532.

Title: Sections 2.1033 and 15.121, Scanning Receiver Compliance Exhibits. *Form No.:* N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 25 respondents; 25 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: One time reporting requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in 47 U.S.C. Sections 154(i), 301, 302, 303(e), 303(f), 303(g), 303(r), 304 and 307.

Total Annual Burden: 25 hours.

Annual Cost Burden: \$1,250.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality:

The Commission's rules require that certain portions of scanning receiver applications for certification will remain confidential after the effective date of the grant of the application. No other assurances of confidentiality are provided to respondents.

Needs and Uses: This collection will be submitted as an extension (no change in reporting and/or third party disclosure requirements) after this 60-day comment period to the Office of Management and Budget (OMB) in order to obtain the full three year clearance.

The FCC rules under 47 CFR 2.1033 and 15.121 require manufacturers of scanning receivers to design their equipment so that it has 38 dB of image rejection for Cellular Service frequencies, tuning, control and filtering circuitry are inaccessible and any attempt to modify the scanning receiver to receive Cellular Service transmissions will likely render the scanning receiver inoperable. The Commission's rules also require manufacturers to submit information with any application for certification that describes the testing method used to determine compliance with the 38 dB image rejection ratio, the design features that prevent modification of the scanning receiver to receive Cellular Service transmissions, and the design steps taken to make tuning, control, and filtering circuitry inaccessible. Furthermore, the FCC requires equipment to carry a statement assessing the vulnerability of the scanning receiver to modification and to have a label affixed to the scanning

receiver, similar to the following as described in section 15.121:

Warning: Modification of this device to receive cellular radiotelephone service signals is prohibited under FCC Rules and Federal Law.

The Commission uses the information required in this equipment authorization process to determine whether the equipment that is being marketed complies with the Congressional mandate in the Telephone Disclosure and Dispute Resolution Act of 1992 (TDDRA) and applicable Commission rules.

Federal Communications Commission.

Marlene H. Dortch,

Secretary, Office of the Secretary, Office of Managing Director.

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

Focus Group Study for Raising Public Awareness of Deep Vein Thrombosis/Pulmonary Embolism—New—National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Division of Blood Disorders, located within the National Center on Birth Defects and Developmental Disabilities, implements health promotion and wellness programs designed to prevent secondary conditions in people with bleeding and clotting disorders.

There are few public health problems as serious as deep vein thrombosis

(DVT) and pulmonary embolism (PE), yet these conditions receive little attention. DVT/PE is an underdiagnosed, serious, preventable medical condition that occurs when a blood clot forms in a deep vein. These clots usually develop in the lower leg, thigh, or pelvis, but they can also occur in the arm. In more than one third of people affected by DVT, clots can travel to the lungs and cause PE, a potentially fatal condition.

The precise number of people affected by DVT/PE is unknown, but estimates range from 300,000 to 600,000 annually in the United States. DVT/PE is associated with substantial morbidity and mortality: One third of people with DVT/PE will have a recurrence within 10 years and one third of people die within 1 month of diagnosis. Among people who have had a DVT, one third will have long-term complications (post-thrombotic syndrome), such as swelling, pain, discoloration, and scaling in the affected limb. In some cases, the symptoms can be so severe that a person can become disabled. More troubling, sudden death is the first symptom in about one quarter of people who have a PE.

The Division of Blood Disorders submitted questions to the 2007 *HealthStyles* survey to determine the public's knowledge of DVT, its common symptoms, and risk factors. Although over 60% of respondents identified pain and swelling as symptoms, 60% did not identify tenderness (often the first sign of DVT) as a symptom. Only 38% of respondents knew that a DVT was a blood clot in a vein, and most could not identify common risk factors for DVT such as sitting for a long period of time (e.g., during air travel); having a leg or foot injury; having a family member who has had a DVT; taking birth control pills; or getting older; and certain groups could not identify risk factors that specifically applied to their risk. The results of this survey demonstrate the need for greater awareness of DVT and its risk factors and the data show that there are many opportunities to develop audience specific messages that are age specific and culturally appropriate.

Much of the morbidity and mortality associated with DVT/PE could be prevented with early and accurate diagnosis and management. DVT/PE is preventable. It is important for people to be able to recognize the signs and symptoms and know when to seek care and available treatment. Individuals, families, and their support communities can reduce their risk by understanding DVT/PE and its risk factors. DVT/PE affects people of all races and ages.

Many of the acquired risks such as obesity, advanced age, air travel, chronic diseases, cancer, and hospitalization are increasing in the United States, and we can expect to see increasing numbers of people affected by DVT/PE.

The CDC's Division of Blood Disorders will conduct focus groups to develop messaging concepts that will be used in a public awareness campaign to build knowledge and awareness of DVT/PE, increase recognition of the symptoms and risk factors for DVT/PE, and empower people to take action.

The project will address these objectives in two stages: in the first stage the Contractor selected will conduct eight (8) formative focus groups with

nine (9) participants in each focus group to explore consumer knowledge, attitudes, and beliefs (KABs) toward DVT. Message concepts will be developed from insights emerging from this exploratory research phase. The Contractor will conduct eight (8) focus groups with nine (9) participants in each focus group during the second stage to test the message concepts and identify possible ways to present the messages.

The Contractor selected will work with CDC to identify and recruit focus group participants. Formative research participants will include adults (aged 25–64) who have been hospitalized in the last year and seniors (aged 65–80).

Message testing participants will include adults (aged 25–64) who have been hospitalized in the last year and seniors (aged 65–80). Participants will be recruited to participate in one of sixteen in-person focus groups that will be conducted in the following cities:

- Atlanta, Baltimore, Pittsburgh, and Tampa (formative research task), and
- Atlanta, Baltimore, Pittsburgh, and Tampa (message testing task).

It is estimated that a total of 144 respondents will have to be screened in order to recruit 36 focus group participants for each year. There are no costs to the respondents other than their time. The estimated annualized burden hours are 125.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number responses per respondent	Average burden per response (in hours)
Seniors (65–80)	Participant Screener	144	1	5/60
Adults (25–64) recently hospitalized				
Seniors (65–80)	Participant Re-screener	36	1	9/60
Adults (25–64) recently hospitalized				
Seniors (65–80)	Moderator's Guide: Formative Research Focus Groups.	36	1	1.5
Adults (25–64) recently hospitalized				
Seniors (65–80)	Moderator's Guide: Message Testing Focus Groups.	36	1	1.5
Adults (25–64) recently hospitalized				
Seniors (65–80)	Informed Consent Form	36	1	6/60
Adults (25–64) recently hospitalized				

Dated: June 3, 2011.

Daniel L. Holcomb,

Reports Clearance Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket Number CDC–2011–0006]

[RIN 0920–ZA03]

Privacy Act of 1974; System of Records

AGENCY: Department of Health and Human Services (HHS), Centers for Disease Control and Prevention (CDC), National Institute for Occupational Safety and Health (NIOSH).

ACTION: Notification of proposed altered system of records; clarification.

SUMMARY: On May 27, 2011, the Centers for Disease Control and Prevention

(CDC), located within the Department of Health and Human Services (HHS), published a Notification of Proposed Altered System of Records for its system of records, 09–20–0147, “Occupational Health Epidemiological Studies and EEOICPA Program Records, HHS/CDC/NIOSH.” This document offers clarifications to the May publication.

DATES: Comments must be received on or before June 27, 2011.

ADDRESSES: You may submit written comments, identified by the Privacy Act System of Records Number 09–20–0147, to the following address: HHS/CDC Senior Official for Privacy (SOP), Office of the Chief Information Security Officer (OCISO), 4770 Buford Highway—M/S: F–35, Atlanta, GA 30341.

You may also submit written comments electronically to <http://www.regulations.gov>. Comments must be identified by Docket No. CDC–2011–0006. Please follow directions at <http://www.regulations.gov> to submit comments.

All relevant comments received will be posted publicly to <http://www.regulations.gov> without change,

including any personal or proprietary information provided. An electronic version of the draft is available to download at <http://www.regulations.gov>.

Written comments, identified by Docket No. CDC–2011–0006, and/or Privacy Act System of Records Number 09–20–0147, will be available for public inspection Monday through Friday, except for legal holidays, from 9 a.m. until 3 p.m., Eastern Daylight Time, at 4770 Buford Highway—M/S: F–35, Atlanta, GA 30341. Please call ahead to (770) 488–8660, and ask for a representative from Office of the Chief Information Security Officer (OCISO) to schedule your visit. Comments may also be viewed at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Beverly E. Walker, Chief Privacy Officer, Centers for Disease Control and Prevention, 4770 Buford Highway—M/S: F–35, Atlanta, Georgia 30341, (770) 488–8660. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: In the May 27, 2011, notice (76 FR 31212), CDC provided information regarding the
