

families. The data also will have significant implications for policy and program development for child well-being programs nationwide.

The purpose of this request is to obtain OMB approval for an extension of the original three year request which was approved on March 31, 2009. Forty-three of the original 53 grantees were awarded for a five-year grant period, thus necessitating an extension of the original request in order to continue data collection for the remainder of the grant period. The first submission of RPG grantee data to the RPG data collection system occurred in December, 2008, and every six months thereafter. Data collection will be conducted for the fifth year of the grant period, ending September 30, 2012, with data submission by January 2013. Data collection may be extended for one year

until January 2014 should grantees request and be granted no-cost extensions.

To minimize grantee data collection and reporting burden, many of the data elements are already being collected by counties and States in order to report Federally-mandated data for the Adoption and Foster Care Analysis and Reporting System (AFCARS), the Treatment Episode Data Set (TEDS) and the National Outcome Measures (NOMs); in addition, all States voluntarily submit data for the Federal National Child Abuse and Neglect Data System (NCANDS). Therefore, most child welfare data elements included in the RPG performance measures can be found in a State's automated case management system, which is often a Federally-funded Statewide Automated Child Welfare Information System

(SACWIS). TEDS admission and discharge data are collected by State substance abuse agencies according to their own information systems for monitoring substance abuse treatment admissions and transmitted monthly or quarterly to the SAMHSA contractor.

As a result of prior Federal government reporting requirements, States are already collecting several data elements needed by the RPGs. The RPG lead agency or their state or local partners are able to download information from these existing State child welfare and substance abuse treatment data systems to obtain data to monitor their RPG program outcomes, thereby reducing the amount of primary data collection needed.

Respondents: RPG Grantees.

I. Cellular, Tissue, and Gene Therapies Advisory Committee

The Agency requests nominations for a nonvoting industry representative on the Cellular, Tissue, and Gene Therapies Advisory Committee. The Cellular, Tissue, and Gene Therapies Advisory Committee advises the Commissioner of Food and Drugs (the Commissioner) or designee in discharging responsibilities as they relate to the regulation of cellular and gene therapy products.

FDA has a special interest in ensuring that women, minority groups, individuals with physical disabilities, and small businesses are adequately represented on its advisory committees, and therefore, encourages nominations for appropriately qualified candidates from these groups. Specifically, in this document, nominations for nonvoting representatives of industry interests are encouraged from the cellular and gene therapy products biotech industry.
