

for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION: OEC, formed under Title XVIII of the Homeland Security Act of 2002, 6 U.S.C. 101 *et seq.*, is required to develop the NECP, which will include identification of goals, timeframes, and appropriate measures to achieve interoperable communications capabilities. The NECP Tribal Report is designed to meet these statutory requirements.

OEC will use the information gained through the reports to track progress that tribes are making in implementing milestones and demonstrating goals of the NECP. The report will provide OEC with broader capability data across the lanes of the Interoperability Continuum, which are key indicators of consistent success in response-level communications.

Tribes with public safety capabilities (police, fire, emergency medical services, emergency managers, dispatchers, radio operators, government workers, etc.) will be responsible for collecting this information from their respective tribes. Tribal points of contact will complete and submit the report directly to OEC through paper mailing at DHS/NPPD/CS&C/OEC, Ryan Oremland, 245 Murray Lane, SW., Mailstop 0614, Washington, DC 20528-0614 or unclassified electronic submission to NECPgoals@hq.dhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of

Homeland Security (DHS) proposes to establish a new system of records titled, "DHS/ALL-033 Reasonable Accommodations Records System of Records."

This system will allow the Department to collect and maintain records on applicants for employment as well as employees with disabilities who requested or received reasonable accommodations by the Department as required by the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA) Amendments of 2008. Reasonable accommodations provide modifications or adjustments to: (1) The job application process that enables a qualified applicant or individual with a disability to enjoy equal employment opportunities available to persons without a disability; (2) the work environment; and/or (3) the manner in which a position is customarily performed.

Sections 501, 504, and 701 of the Rehabilitation Act of 1973 and the ADA Amendments of 2008 require federal agencies to provide reasonable accommodation to qualified applicants for employment and employees with disabilities if known or requested, unless the accommodation would impose an undue hardship. The purpose of reasonable accommodations is to provide modifications or adjustments to: (1) The job application process that enables a qualified applicant or individual with a disability to enjoy equal employment opportunities available to persons without a disability; (2) the work environment; and/or (3) the manner in which a position is customarily performed. Reasonable accommodations may include, but are not limited to: (1) Making existing facilities readily accessible to and usable by individuals with disabilities; (2) job restructuring, modification of work schedules or place of work, extended leave, telecommuting, or reassignment to a vacant position; and/or (3) acquisition or modification of equipment or devices, including computer software and hardware, appropriate adjustments or modifications of examinations, training materials or policies, the provision of qualified readers and/or interpreters, personal assistants, service animals, and other similar accommodations.

The purpose of this system is to allow the Department to collect and maintain records on applicants for employment as well as employees with disabilities who requested or received reasonable accommodations by the Department as required by the Rehabilitation Act of 1973 and the ADA Amendments of 2008. The purpose of this system is also

to track processing of requests for reasonable accommodation Department-wide to comply with applicable law and regulations and to preserve and maintain the confidentiality of medical information. DHS is authorized to implement this reasonable accommodation program primarily through Sections 501, 504, and 701 of the Rehabilitation Act of 1973 and the ADA Amendments Act of 2008. This system has an effect on individual privacy that is balanced by the need to collect and maintain information on applicants and employees with disabilities requiring reasonable accommodations. Routine uses contained in this notice include sharing information with the Department of Justice (DOJ) for legal advice and representation; to a congressional office at the request of an individual; to the National Archives and Records Administration (NARA) for records management; to contractors in support of their contract assignment to DHS; to agencies, organizations, or individuals for the purpose of audit; to agencies, entities, or persons during a security or information compromise or breach; to an agency, organization, or individual when there could potentially be a risk of harm to an individual; to an appropriate federal, state, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order; to other Federal agencies when seeking advice or assistance on issues related to reasonable accommodations; to third parties contracted by the Department to facilitate mediation or other dispute resolution procedures or programs; and to the news media in the interest of the public. A review of this system is being conducted to determine if the system of records collects information under the Paperwork Reduction Act (PRA). This system will be included in the DHS inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the

individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR Part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which their records are put, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/ALL-033 Reasonable Accommodations Records System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to OMB and to Congress.

SUPPLEMENTARY INFORMATION:**Background**

In September 2009, the Coast Guard held a Cargo Security Symposium in Reston, Virginia, to inform and guide the development of a national strategy for reducing the maritime security risks present in the bulk transportation and transfer of CDCs within ports and waterways of the United States. Because CDCs have chemical properties that, if released, could result in substantial death and injury in high density population areas and significant damage to critical infrastructure and key resources (CIKR), it is important for the Coast Guard, in concert with stakeholders, to implement a holistic strategy to mitigate CDC transport, transfer, and storage security risks. These security risks can be reduced through sound risk management and shared responsibility between public and private sector stakeholders, across the Security Spectrum.¹

Following the 2009 Cargo Security Symposium, a National Cargo Security Risk Reduction Workgroup for CDCs was chartered by the Coast Guard to discuss CDC security topics that could inform the development of a CDC Security National Strategy. The results of the workgroup's discussions have led to the development of components that

will comprise a working draft of the CDC Security National Strategy. The working draft will be further informed by a required CDC Security National Study, called for by section 812 of the Coast Guard Authorization Act of 2010 and input received at the public listening sessions described in this notice.

Agenda of Public Meeting

The Coast Guard is holding listening sessions to discuss the working draft of the CDC Security National Strategy and further its development. Primarily, we are soliciting stakeholder input on the goals and how best to implement those goals under a "shared responsibility" paradigm. The agenda for the two sessions will principally consist of a presentation and discussion of certain elements of the working draft of the CDC Security National Strategy and future strategy implementation considerations. Included in the CDC Security National Strategy, and to be discussed, are the following goals:

- Provide to internal and external stakeholders real-time national, regional, and local awareness of the risk of intentional attacks on the CDC Marine Transportation System.
- Consistently assess vulnerability to threats of intentional attacks on the CDC Marine Transportation System and mitigate the vulnerability to an acceptable level.
- Dynamically assess the potential consequences of intentional attacks on the CDC Marine Transportation System and capably mitigate, through coordinated response, the impact of a successful attack.
- Lead the development of national, regional, and local resiliency/recovery capability from successful attacks on the CDC Marine Transportation System.

This notice is issued under the authority of 5 U.S.C. 552(a).

Dated: July 7, 2011.
