SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the renewal of Source Materials License SUA-1341 for the continued uranium production operations and the recovery of uranium by *in-situ* recovery (ISR) at the Irigaray and Christensen Ranch facilities in Johnson and Campbell Counties, Wyoming (Willow Creek Project). The NRC has prepared an Environmental Assessment (EA) in support of this proposed license renewal in accordance with the requirements of 10 CFR part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The NRC is also conducting a safety evaluation of the proposed license renewal, pursuant to 10 CFR part 40. The results of the safety evaluation will be documented in a separate Safety Evaluation Report. If approved, the NRC will issue the renewed license following the publication of this notice.

II. EA Summary

The proposed licensing action is to renew Source Materials License SUA-1341 for a 10-year period to authorize Uranium One USA, Inc. to continue ISR operations at the Irigaray and Christensen Ranch facilities in Campbell and Johnson Counties, Wyoming. On May 30, 2008, COGEMA Mining, Inc. (COGEMA) submitted an application to renew Source Materials License SUA-1341. A Notice of License Renewal Request and an Opportunity for Hearing was published in the **Federal Register** on February 9, 2009 (74 FR 6436). In response, the Oglala Delegation of the Great Sioux Nation Treaty Council (Delegation) and the Powder River Basin Resource Council (Council) filed petitions to intervene and requests for hearing. For reasons stated in the Memorandum and Order LBP-09-13, dated July 23, 2009, the Atomic Safety and Licensing Board concluded that neither the Delegation nor the Council demonstrated standing as required by 10 CFR 2.309(a). Therefore, the petitions were denied.

During the NRC's review of the license renewal request, the Irigaray and Christensen Ranch ISR Project underwent a change in control from COGEMA Mining, Inc. to Uranium One, Inc. (Uranium One). Subsequently, the Irigaray and Christensen Ranch ISR Project underwent a second change in control and ownership from Uranium One to Rosatom, through JSC Atomredmetzoloto (ARMZ). While the parent company changed to Rosatom, Uranium One USA, Inc., a daughter

company of Uranium One and Rosatom, remains the licensee.

The staff has prepared an EA in support of the proposed license renewal. Staff considered the following environmental resource areas in its evaluation: Land use; transportation; socioeconomics; air quality; water quality and use; geology and soils; ecology; noise; historical and cultural; scenic and visual; public and occupational health and safety; and waste management. The environmental impacts on these resource areas were determined to be small. The license renewal request does not require altering the site footprint nor does it change the operating processes of the existing facility; therefore, there are no anticipated significant impacts on land use, noise, historic and cultural, scenic and visual, or ecological resources. The proposed action will not adversely affect Federal or state-listed threatened or endangered species. Public and occupational exposures are below the limit established in 10 CFR Part 20. Uranium One USA, Inc. maintains acceptable waste management practices and procedures. The staff concluded that the proposed 10-year renewal of Source Materials License SUA-1341 will not result in a significant impact to the environment.

NRC staff consulted with other agencies regarding the proposed action, including the Wyoming State Historic and Preservation Office, Wyoming Department of Environmental Quality, Buffalo Field Office of the Bureau of Land Management, the Eastern Shoshone Tribe, the Northern Arapaho Tribe, the Northern Cheyenne Tribe, the Blackfeet Nation, Three Affiliated Tribes (Mandan, Hidatsa, and Arikara), the Ft. Peck Assiniboine/Sioux, the Oglala Sioux Tribe, the Crow Nation, and the Cheyenne River Sioux Tribe. The consultations ensured that the requirements of Section 7 of the Endangered Species Act and Section 106 of the National Historic Preservation Act were met and provided the designated state liaison agency the opportunity to comment on the proposed action.

III. Finding of No Significant Impact

On the basis of the EA, the NRC has concluded that the proposed license renewal will not significantly affect the quality of the human environment. Therefore, preparation of an environmental impact statement is not warranted for the proposed action and a finding of no significant impact is appropriate.
