Abstract: The Fast Response Survey System (FRSS) and the Postsecondary Education Quick Information System (PEQIS) collect issue-oriented data quickly and with minimum response burden outside of National Center of Education Statistics' (NCES') large recurring surveys. Both systems were designed to collect and report data on key education issues at the elementary and secondary levels, and to meet the data needs of Department of Education analysts, planners, and decision-makers when information cannot be collected quickly through NCES' large recurring surveys. The purpose of the forthcoming two complementary FRSS and PEQIS surveys is to collect data about dual credit and dual enrollment programs offered to high school students. The FRSS 104 survey will provide nationally representative data on prevalence and enrollment of dual credit and exam-based courses in public high schools, while the PEQIS 18 will provide nationally representative data on the prevalence of college course-taking by high school students both within and outside of dual enrollment programs offered by postsecondary institutions. This is the second iteration of both surveys, previously conducted in school year 2002–03. This request is for clearance of the FRSS 104 and PEQIS 18 questionnaires and full scale data collection.

Longitudinal Transition Study 2012.

Abstract: To gauge progress in addressing the needs of youth with disabilities, the U.S. Department of Education is sponsoring a five-year longitudinal study focused on the educational and transitional experiences of youth between the ages of 13 and 21 in December 2011. The study focuses on three sets of research questions: What are the characteristics of youth with disabilities? What services and accommodations do they receive and what are their courses of study? What are their transitional experiences as they leave high school and their educational, social, and economic outcomes?

The study will compare this group with three other groups: (1) Youth who have no identified disability, (2) youth who do not have an individualized education plan (IEP) but who have a condition that qualifies them for accommodation under Section 504 of

the Vocational Rehabilitation Act of 1973, and (3) similar cohorts of youth with an IEP who were studied in the past.

Districts and youth will be randomly selected to ensure that they are nationally representative. The study sample will include approximately 500 school districts and 15,000 students. Phase I data collection will occur in spring 2012 and spring 2014, when sample members will be ages 13–21 and 15–23, respectively. The study will collect data from parents, youth, principals, teachers, and student school records.

SUPPLEMENTARY INFORMATION: The information collected under the requirements of FERC–510, “Application for Surrender of Hydropower License”, (OMB No. 1902–0068) is used by the Commission to

implement the statutory provisions of sections 4(e), 6 and 13 of the Federal Power Act (FPA) 16 U.S. Code (U.S.C). sections 797(e), 799 and 806. Section 4(e) gives the Commission authority to issue licenses for the purposes of constructing, operating and maintaining dams, water conduits, reservoirs, powerhouses, transmission lines or other power project works necessary or convenient for developing and improving navigation, transmission and utilization of power over which Congress has jurisdiction. Section 6 gives the Commission the authority to prescribe the conditions of licenses including the revocation or surrender of the license. Section 13 defines the Commission’s authority to delegate time periods for when a license must be terminated if project construction has not begun. Surrender of a license may be desired by a licensee when a licensed project is retired, not constructed, or natural catastrophes have damaged or destroyed the project facilities. The information collected under the designation FERC–510 is in the form of a written application for surrender of a hydropower license. The information is used by Commission staff to determine the broad impact of such surrender. The Commission will issue a notice soliciting comments from the public and other agencies and conduct a careful review of the prepared application before issuing an order for surrender of a license. The order is the result of an analysis of the information produced, *i.e.*, economic, environmental concerns, *etc.*, which are examined to determine if the application for surrender is warranted. The order implements the existing regulations and is inclusive for surrender of all types of hydropower licenses issued by FERC and its predecessor, the Federal Power Commission. The Commission implements these mandatory filing requirements in the Code of Federal Regulations (CFR) under 18 CFR 6.1–6.4.

Action: The Commission is requesting a three-year extension of the current expiration date, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:

	Number of respondents annually	Number of responses per respondent	Average burden hours per response	Total annual burden hours
