Title: National Oil and Hazardous Substance Pollution Contingency Plan (NCP) (Renewal).

ICR numbers: EPA ICR No.1463.08, OMB Control No. 2050–0096.

ICR Status: This ICR is scheduled to expire on July 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR Part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR covers the remedial portion of the Superfund Program, as specified in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 as amended (CERCLA) and the National Oil and Hazardous Substance Pollution Contingency Plan (NCP). All remedial actions covered by this ICR (e.g., Remedial Investigations/Feasibility Studies) are stipulated in the statute (CERCLA) and are instrumental in the process of cleaning up National Priorities List (NPL) sites to be protective of human health and the environment. Some community involvement activities covered by this ICR are not required at every site (e.g., Technical Assistance Grants) and depend very much on the community and the nature of the site and cleanup. All community activities seek to involve the public in the cleanup of the sites, gain the input of community members and include the community's perspective on the potential future reuse of the Superfund NPL sites. Community Involvement activities can enhance the remedial process and increase community acceptance and the potential for productive and useful reuse of the sites.

The respondents on whom a burden is placed include state and tribal governments and communities. Potentially Responsible Parties (PRPs) are not addressed in this ICR because the Paperwork Reduction Act does not require the inclusion of those entities that are the subject of administrative or civil action by the Agency. The ICR reports the estimated reporting and recordkeeping burden hours and costs expected to be incurred by these entities and by the Federal government in its oversight capacities of state action and

administration of community activities at Fund-lead NPL sites. Remedial activities undertaken by states at NPL sites are those required and recommended by CERCLA and the NCP and the cost of many of these activities may be reimbursed by the Federal government. All community involvement in the remedial process of Superfund is voluntary. Therefore, all cost estimates for community members is theoretical and does not represent expenditure of actual dollars.

States have responsibilities at new and ongoing state-lead sites and at all state-lead, Federal-lead and Federal Facility sites entering the remedial phase of Superfund. All other remedial activities taken by the state are done so at sites which the state voluntarily assumes the lead agency role. Over each year of this ICR, the state will be completing remedial activities at sites that entered the remedial phase of Superfund at different times.

Community members' participation in remedial activities at Superfund sites is purely voluntary, and the level of involvement varies greatly depending on the complexity of the site, its location (urban vs. rural, industrial vs. residential, etc.) and the level of interest.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 14 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: State/tribal governments and individual community members who voluntarily participate in the remedial phase of the Superfund program and in associated community involvement activities throughout the Superfund process.

Estimated Number of Respondents: 11,397.

Frequency of Response: Once, On Occasion.

Estimated Total Annual Hour Burden: 179,615 .

Estimated Total Annual Cost: \$813,440, which is entirely for the cost of labor. All other associated costs to respondents are reimbursed by the Federal government.

Changes in the Estimates: There is an increase of 108,450 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is primarily due to an adjustment in estimates attributable to the increase in the number of sites estimated to have RI/FS starts and ongoing RI/FS activity as well as an the increase in the number of sites expected to have Proposed Plans developed, and the introduction of customer satisfaction surveys at certain sites.

Dated: July 21, 2011.

John Moses,

Director, Collection Strategies Division.
