SUPPLEMENTARY INFORMATION: In the "Rules and Regulations" section of today's **Federal Register**, we are publishing a direct final Notice of Deletion for the PBL Superfund Site without prior Notice of Intent for Deletion because EPA views this as a noncontroversial revision and anticipates no adverse comments. We have explained our reason for this deletion in the preamble to the direct final Notice of Deletion, and those reasons are incorporated herein. If we receive no adverse comment(s) on this deletion action, we will not take further action on this Notice of Intent for Deletion. If we receive adverse comment(s), we will withdraw the direct final Notice of Deletion and it will not take effect. We will, as appropriate, address all public comments in a subsequent final Notice of Deletion based on this Notice of Intent for Deletion. We will not institute a second comment period on this Notice of Intent for Deletion. Any parties

interested in commenting must do so at this time.

For additional information, see the direct final Notice of Deletion which is located in the Rules section of this **Federal Register**.

44 CFR Part 67

[Docket ID FEMA-2008-0020; Internal Agency Docket No. FEMA-B-1037]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: On March 25, 2009, FEMA published in the **Federal Register** a proposed rule that contained an erroneous table. This notice provides corrections to that table, to be used in lieu of the information published at 74 FR 12804. The table provided here represents the flooding sources, location of referenced elevations, effective and modified elevations, and communities affected for Livingston County, Kentucky, and Incorporated Areas. Specifically, it addresses the following flooding sources: Bayou Creek (backwater effects from Ohio River), Bayou Creek Tributary 20 (backwater effects from Ohio River), Bissell Creek (backwater effects from Ohio River), Buck Creek (backwater effects from Ohio River), Claylick Creek (backwater effects from Ohio River), Cooper Creek (backwater effects from Tennessee River), Cumberland River (backwater effects from Ohio River), Cypress Creek (backwater effects from Ohio River),

Deer Creek (backwater effects from Ohio River), Dry Branch (backwater effects from Tennessee River), Dry Fork (backwater effects from Ohio River), Dyer Hill Creek (backwater effects from Ohio River), Ferguson Creek (backwater effects from Ohio River), Givens Creek (backwater effects from Ohio River), Guess Creek (backwater effects from Tennessee River), Guess Creek Tributary 9 (backwater effects from Tennessee River), Hickory Creek (backwater effects from Ohio River), Jones Creek (backwater effects from Tennessee River), Kentucky Lake, Lake Barkley, Lee Creek (backwater effects from Tennessee River), McCormick Creek (backwater effects from Ohio River), McGilligan Creek (backwater effects from Ohio River), Ohio River, Phelps Creek (backwater effects from Ohio River), Phelps Creek Tributary 2 (backwater effects from Ohio River), Sandy Creek (backwater effects from Ohio River), Smith Creek (backwater effects from Ohio River), Snglin Creek (backwater effects from Ohio River), Sugar Creek (backwater effects from Ohio River), Sugarcamp Creek (backwater effects from Ohio River), Sugarcamp Creek Tributary 3 (backwater effects from Ohio River), the Tennessee River, and Turkey Creek (backwater effects from Ohio River).

DATES: Comments are to be submitted on or before October 27, 2011.

ADDRESSES: You may submit comments, identified by Docket No. FEMA-B-1037, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-4064 or (e-mail) luis.rodriguez1@dhs.gov.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-4064 or (e-mail) luis.rodriguez1@dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are minimum requirements. They

should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings.

Corrections

In the proposed rule published at 74 FR 12804, in the March 25, 2009, issue of the **Federal Register**, FEMA published a table under the authority of 44 CFR 67.4. The table entitled "Livingston County, Kentucky and Incorporated Areas" addressed the flooding sources Kentucky Lake, Lake Barkley, Ohio River, and Tennessee

River. That table contained inaccurate information as to the location of referenced elevation, effective and modified elevation in feet, and/or communities affected for those flooding sources. In addition, it did not include the following flooding sources: Bayou Creek (backwater effects from Ohio River), Bayou Creek Tributary 20 (backwater effects from Ohio River), Bissell Creek (backwater effects from Ohio River), Buck Creek (backwater effects from Ohio River), Claylick Creek (backwater effects from Ohio River), Cooper Creek (backwater effects from Tennessee River), Cumberland River (backwater effects from Ohio River), Cypress Creek (backwater effects from Ohio River), Deer Creek (backwater effects from Ohio River), Dry Branch (backwater effects from Tennessee River), Dry Fork (backwater effects from Ohio River), Dyer Hill Creek (backwater effects from Ohio River), Ferguson Creek (backwater effects from Ohio River), Givens Creek (backwater effects from Ohio River), Guess Creek (backwater effects from Tennessee River), Guess

Creek Tributary 9 (backwater effects from Tennessee River), Hickory Creek (backwater effects from Ohio River), Jones Creek (backwater effects from Tennessee River), Lee Creek (backwater effects from Tennessee River), McCormick Creek (backwater effects from Ohio River), McGilligan Creek (backwater effects from Ohio River), Phelps Creek (backwater effects from Ohio River), Phelps Creek Tributary 2 (backwater effects from Ohio River), Sandy Creek (backwater effects from Ohio River), Smith Creek (backwater effects from Ohio River), Snglin Creek (backwater effects from Ohio River), Sugar Creek (backwater effects from Ohio River), Sugarcamp Creek (backwater effects from Ohio River), Sugarcamp Creek Tributary 3 (backwater effects from Ohio River), and Turkey Creek (backwater effects from Ohio River). In this notice, FEMA is publishing a table containing the accurate information, to address these prior errors. The information provided below should be used in lieu of that previously published.
