

and content of IU discharges and IU schedules for installing pretreatment equipment. Data also include actual or anticipated IU discharges of wastes that violate pretreatment standards, have the potential to cause problems at the POTW, or are considered hazardous under the Resource Conservation and Recovery Act (RCRA). OWM uses the data collected under the pretreatment program to monitor and enforce compliance with the pretreatment regulations, as well as to authorize program administration at the State or local (POTW) level. States and POTWs applying for approval of their pretreatment programs submit data concerning their legal, procedural, and administrative bases for establishing such programs. This information may include surveys of IUs, local limits for pollutant concentrations, and schedules for completion of major project requirements. IUs and POTWs submit written reports to the approved State or EPA. These data may then be entered into the NPDES databases by the approved State or by EPA.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 73.1 hours per respondent per year, or 18.1 hours per response.

Estimated total number of potential respondents: 24,411 (36 States, 1,548 POTWs and 22,827 industrial users).

Frequency of response: On occasion, semi-annually, annually, and as needed.

Estimated total average number of responses for each respondent: 4.0.

Estimated total annual burden hours: 1,784,568 hours.

Estimated total annual costs: \$76,773,776. This includes an estimated burden cost of \$74,454,863 and an estimated cost of \$2,318,913 for capital investment or maintenance and operational costs.

Change in Burden: There is a decrease of 12,5195 (0.7%) hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. Most of the decrease in burden is attributed to the decrease in the number of SIUs. EPA revised the estimated number of SIUs and pretreatment programs after extensive consultation with the EPA regions and a thorough examination of PCS data. This ICR shows a shift in burden from POTWs to States as a consequence of EPA's updated estimates of SIUs regulated by POTWs and States. However, EPA does not believe this is the result of programmatic changes but simply a reflection of more accurate information about the implementation of the pretreatment program.

What is the next step in the process for these ICRs?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: August 12, 2011.

When finalizing the draft document, EPA intends to consider any public comments that EPA receives in accordance with this notice. The public comments submitted in accordance with

this notice will be made available to the peer review panel.

The draft document is also being provided to EPA's Science Advisory Board (SAB), a body established under the Federal Advisory Committee Act, for independent external peer review. The public comment period and the EPA Science Advisory Board (SAB) peer-review, which will be scheduled at a later date and announced in the Federal Register, are separate processes that provide opportunities for all interested parties to comment on the document.

EPA is also announcing a listening session to be held on October 6, 2011 during the public comment period for this draft assessment. The purpose of the listening session is to allow all interested parties to present scientific and technical comments on draft IRIS health assessments to EPA and other interested parties attending the listening session. EPA welcomes the scientific and technical comments that will be provided to the Agency by the listening session participants. The comments will be considered by the Agency as it revises the draft assessment after the independent external peer review. If listening session participants would like EPA to share their comments with the external peer reviewers, they should also submit written comments during the public comment period using the detailed and established procedures described in the **SUPPLEMENTARY INFORMATION** section of this notice.

SUPPLEMENTARY INFORMATION:

I. Information About IRIS

EPA's Integrated Risk Information System (IRIS) provides information about over 540 chemicals to which the public may be exposed from releases to

air, water, and land and through the use and disposal of chemicals. IRIS assessments provide a scientific foundation for decisions to protect public health across EPA's programs and regions under an array of environmental laws. The IRIS database is publicly available online at <http://www.epa.gov/iris> and is used by state and local governments, environmental specialists, healthcare professionals, and international institutions to characterize the potential health effects of contaminant exposure. Over the past 2 years, EPA has strengthened and streamlined the IRIS program, improving transparency and increasing the number of final assessments added to the database. Continually improving the IRIS program is an ongoing priority for the Agency.
