SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) National Protection and Programs Directorate (NPPD) proposes to update the DHS system of records titled, ''DHS/NPPD—001 National Infrastructure Coordinating Center (NICC) Records System of Records.'' The Department will not claim Privacy Act exemption (k)(3), as originally published in the SORN and Notice of Proposed Rulemaking (NPRM) in the **Federal Register**, 75 FR 69603, on November 15, 2010.

This system of records will allow DHS/NPPD, including the NICC (an extension of the National Operations Center (NOC)) to collect, plan, coordinate, report, analyze, and fuse infrastructure information related to all-threats and all-hazards, law enforcement activities, intelligence activities, man-made disasters and acts of terrorism, natural disasters, and other information collected or received from Federal, state, local, Tribal, and territorial agencies and organizations; foreign governments and international organizations; domestic security and emergency management officials; and private sector entities or individuals into the NICC.

The NICC provides the mission and capabilities to assess the operational status of the nation's 18 critical infrastructures and key resources (CIKR) sectors during normal operations and incident management activities, supports information sharing with National Infrastructure Protection Plan (NIPP) partners, and owners and operators of critical infrastructure facilities, and facilitates information sharing across and between the 18 national sectors.

The NICC is both an operational component of the NPPD Office of Infrastructure Protection (IP) and a watch operations element of the DHS NOC. The NICC operates 24 hours a day, 7 days a week, 365 days a year to facilitate coordination and information sharing with the CIKR sectors. The NICC produces consolidated CIKR reports for incorporation into situational awareness reports and for inclusion into the common operating picture.

DHS is authorized to implement this program primarily through the Homeland Security Act of 2002 as codified within 6 U.S.C. 321d(b)(1), § 515. This system has an effect on individual privacy that is balanced by the need to collect, plan, coordinate, report, analyze, and fuse CIKR information coming into and going out of the NICC as well as the NOC. Routine uses contained in this notice include sharing with the Department of Justice (DOJ) for legal advice and representation; to a congressional office at the request of an individual; to the National Archives and Records Administration (NARA) for records management; to contractors in support of their contract assignment to DHS; to appropriate Federal, state, Tribal, local, international, foreign agency, or other appropriate entity including the private sector in their role aiding the NICC in their mission; to agencies, organizations or individuals for the purpose of an audit; to agencies, entities, or persons during a security or information compromise or breach; to an agency, organization, or individual when there could potentially be a risk of harm to an individual; and to the news media in the interest of the public. A review of this system is being conducted to determine if the system of records collects information under the Paperwork Reduction Act (PRA).

Based on the information contained within this system of records, the NICC develops reports that are shared both within DHS and with the CIKR sectors. The NICC creates two reports, one with PII and one without. The one without PII is what is shared broadly with the CIKR sectors as well as the state and local fusion centers. Consistent with DHS's information sharing mission, information contained in the DHS/NPPD—001 NICC Records System of Records may be shared with other DHS components, as well as appropriate Federal, state, local, Tribal, territorial, foreign, or international government agencies. This sharing will only take place after DHS determines that the receiving component or agency has a verifiable need to know the information to carry out national security, law enforcement, immigration, intelligence, or other functions consistent with the routine uses set forth in this system of records notice.

The information within this system that meets the functional standard of the National Suspicious Activity Reporting Initiative will be placed into the DHS/ALL—031 Information Sharing Environment Suspicious Activity Reporting Initiative (September 10, 2010, 75 FR 55335).

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses to their

records are put, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/NPPD—001NICC Records System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.
