

Are there changes in the estimates from the last approval?

Primarily, the decrease in burden is due to finalizing the MACT standards for new and existing industrial, commercial, and institutional boilers and process heaters at major source facilities. Therefore our revised estimate of burden is smaller than that estimated in the last ICR.

What is the next step in the process for this ICR?

EPA will consider any comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: September 1, 2011.

Steve Fruh,

Acting Director, Sector Policies and Programs Division.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9461-5]

Underground Injection Control Program; Hazardous Waste Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; Great Lakes Chemical Corporation, El Dorado, AR

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of a final decision on a no migration petition reissuance.

SUMMARY: Notice is hereby given that a reissuance of an exemption to the land disposal restrictions, under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act, has been granted to Great Lakes Chemical Corporation for two Class I injection wells located at El Dorado, Arkansas. The company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by the petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the continued underground injection by Great Lakes, of the specific restricted hazardous wastes identified in this exemption, into Class I hazardous waste injection wells No. WDW-5 and WDW-6 at the El Dorado, Arkansas facility until December 31, 2017, unless EPA moves to terminate this exemption. Additional conditions included in this final decision may be reviewed by contacting the Region 6 Ground Water/UIC Section. A public notice was issued July 7, 2011. The public comment period closed on August 22, 2011. No comments were received. This decision constitutes final Agency action and there is no Administrative appeal. This decision may be reviewed/appealed in compliance with the Administrative Procedure Act.

DATES: This action is effective as of August 31, 2011.

ADDRESSES: Copies of the petition and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Quality Protection Division, Source Water Protection Branch (6WQ-S), 1445 Ross Avenue, Dallas, Texas 75202-2733.

FOR FURTHER INFORMATION CONTACT: Philip Dellinger, Chief Ground Water/UIC Section, EPA—Region 6, telephone (214) 665-7150.

Dated: August 31, 2011.

Troy Hill,

Acting Division Director, Water Quality Protection Division.
