II. Background

The Tennessee Valley Authority (TVA or the applicant) submitted its Final Supplemental Environmental Impact Statement for the Completion and Operation of WBN Unit 2 (June 2007)

(FSEIS) by letter dated February 15, 2008 (ADAMS Accession No. ML080510469), pursuant to Part 51 of Title 10 of the Code of the Federal Regulations (10 CFR).

On June 30, 1976, TVA submitted an application for an operating license for WBN Unit 2, pursuant to 10 CFR Part 50. An updated operating license application was submitted on March 4, 2009. The proposed action in response to the updated application is the issuance of an operating license that would authorize TVA to possess, use, and operate a second light-water nuclear reactor (the facility), WBN Unit 2, located on the applicant's site in Rhea County, Tennessee. The WBN Unit 2 would operate at a steady-state power level of 3411 megawatts thermal.

A notice of receipt and availability of the updated application, which included the FSEIS, was published in the **Federal Register** on May 1, 2009 (74 FR 20350). A notice of intent to prepare a supplement to the final environmental statement, which was prepared and published in 1978 and to conduct the scoping process was published in the **Federal Register** on September 11, 2009 (74 FR 46799). On October 6, 2009, the NRC held two scoping meetings in Sweetwater, Tennessee, to obtain public input on the scope of the environmental review. The NRC also solicited comments from Federal, State, Tribal, regional, and local agencies.

III. Purpose

The purpose of this document is to inform the public that a draft SFES related to the review of the operating license application has been prepared in accordance with 10 CFR 51.92 and to provide the public an opportunity to comment.

IV. Submitting Comments at Public Meeting

The NRC staff will hold a public meeting to present an overview of the draft SFES and to accept public comments on the document. The public meeting will be held at the Magnuson Hotel at 1421 Murrays Chapel Road in Sweetwater, Tennessee, on Thursday, December 8, 2011. The meeting will consist of two sessions, which will cover the same subjects. The sessions will convene at 2 p.m. and 6:30 p.m. and will continue until 4 p.m. and 8:30 p.m., as necessary. The meeting will be transcribed and will include: (1) A presentation of the contents of the draft SFES and (2) the opportunity for interested government agencies, organizations, and individuals to provide comments on the draft SFES. Additionally, the NRC staff will host

informal discussions 1 hour before the start of each meeting session. No formal comments on the draft SFES will be accepted during the informal discussions. To be considered, comments must be provided either at the transcribed public meeting sessions or by any of the methods provided in the **ADDRESSES** section of this document. Persons may register to attend or present oral comments at the meeting by contacting Ms. Carmen Fells, by telephone at 1-(800) 368-5642, extension 6337, or by email at *Carmen.Fells@nrc.gov* no later than December 1, 2011. Ms. Fells will need to be contacted no later than November 28, 2011, if special equipment or accommodations are needed to attend or present information at the public meeting, so that the NRC staff can determine whether the request can be accommodated.

Dated at Rockville, Maryland, this 2nd day of November 2011.

For the Nuclear Regulatory Commission.

Stephen J. Campbell,

*Chief, Watts Bar Special Projects Branch,
Division of Operating Reactor Licensing,
Office of Nuclear Reactor Regulation.*

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2011-0258]

Proposed Alternative Soils Standards for the Uravan, Colorado Uranium Mill

AGENCY: Nuclear Regulatory Commission.

ACTION: Uranium milling alternative standards.

SUMMARY: By letter dated October 10, 2007, the Colorado Department of Public Health and the Environment (CDPHE)'s, Hazardous Materials and Waste Management Division (the Division) submitted a proposal for alternative standards for soil clean up in four areas of the Uravan Site in Montrose County, Colorado. The Division approved the proposed alternative standards and requested the U.S. Nuclear Regulatory Commission's (NRC or the Commission) concurrence. Colorado's proposed alternative soil standards are to leave the remaining radioactive contamination in place in these four areas without any further remediation. The NRC staff has determined that Colorado's proposal constitutes use of alternative standards. Under Section 274o of the Atomic Energy Act of 1954, as amended (the

Act), the Commission must make a determination that such alternatives will achieve a level of stabilization and containment of the sites concerned, and a level of protection for public health, safety, and the environment from radiological and non-radiological hazards associated with such sites, after notice and opportunity for public hearing. Through this action, the Commission intends to fulfill both the notice and opportunity for public hearing provisions of Section 274o.

DATES: Submit comments by December 12, 2011. Comments received after this date will be considered if it is practical to do so, but the Commission cannot assure consideration of comments received after this date.

ADDRESSES: Please include Docket ID NRC-2011-0258 in the subject line of your comments. For additional instructions on submitting comments and instructions related to this action, see "Submitting Comments and Accessing Information" in the **SUPPLEMENTARY INFORMATION** section of this document. You may submit comments by any one of the following methods:
