SUPPLEMENTARY INFORMATION: On April 5, 2011, notice was published in the *Federal Register* (76 FR 18725) that a request for a scientific research permit to take green sea turtles had been submitted by the above-named individual. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The five-year permit authorizes Dr. Salmon to take juvenile green sea turtles to characterize abundance and distribution in nearshore developmental habitats off the East coast of southern Florida. Dr. Salmon is authorized to capture by hand, transport to shore, measure, weigh, photograph, passive integrated transponder and flipper tag, temporarily mark the carapace, satellite tag, hold overnight, transport to site of capture, release, and recapture turtles at the conclusion of the study for gear removal up to 30 green sea turtles annually. No mortalities are authorized under the permit. These efforts would

aid in the development and refinement of management efforts to recover this species.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: November 14, 2011.

SUPPLEMENTARY INFORMATION:

Background

Section 101(a)(5)(D) of the MMPA (16 U.S.C. 1361(a)(5)(D)) directs the Secretary of Commerce (Secretary) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals of a species or population stock, by United States citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

Authorization for the incidental taking of small numbers of marine mammals shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant). The authorization must set forth the permissible methods of taking, other means of effecting the least practicable adverse impact on the species or stock and its habitat, and requirements pertaining to the mitigation, monitoring and reporting of such takings. NMFS has defined "negligible impact" in 50 CFR 216.103 as "an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival."
