The Commission is requesting OMB approval for an extension (no change in the reporting, recordkeeping and/or third party disclosure requirements).

There is no change in the Commission's previous burden estimates.

In Report and Order and Order on Reconsideration, FCC 11-50, the Commission adopted rules that related to implementation of section 224 pole attachment access rules. Specifically, the pole attachment access rules create a series of deadlines or "timelines" by which communications providers ("attachers") request and receive permission from electric utilities and incumbent LECs ("pole owners" or "utilities") to attach facilities to utility poles ("access"). A denial (or partial grant) of access by a utility must include all relevant evidence and information, and explain how the evidence and information relate to lack of capacity, safety, reliability, or engineering standards. In practice, this requirement causes the utility to survey the requested poles where access is requested and to perform an engineering analysis.

Other paperwork burdens are triggered during the pole-preparation stage of the timeline ("make-ready"). These include sending letters of notification to any known entities with existing attachments and the requesting attacher. Such notification letters are sent when a make-ready schedule is established. If the make-ready period is interrupted; and if the pole owner asserts its right to one 15-day extension of time, notification letters are also required. Pole owners both perform and coordinate make-ready work.

Additionally, the Order adopted a rule requiring utilities to post a list of approved contractors, and required new attachers that use contractors to perform pole attachment surveys or make-ready work in lieu of the utility using its own workers to choose from among approved contractors. If an attacher uses a utility-approved contractor, it must notify the utility, and invite the utility to send a representative to oversee the work.

Finally, the Order also broadens the existing enforcement process by permitting incumbent local exchange carriers (LECs) to file complaints alleging that the attachment rates demanded by electric utilities are unreasonable. The Order also encourages incumbent LECs that benefit from lower pole attachment costs to file data at the Commission that demonstrate that the benefits are being passed on to consumers.

Federal Communications Commission.

Secretary, Office of the Secretary, Office of Managing Director.

Estimated Time per Response: 2–720 hours.

Frequency of Response:

Recordkeeping requirement; on occasion, semi-annual, weekly and annual reporting requirements.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in 47 U.S.C. Sections 154, 303, 307, 334, 336 and 554.

Total Annual Burden: 20,096 hours.

Annual Cost Burden: \$92,605.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality:

In general, there is no need for confidentiality with this collection of information.

Needs and Uses: This information collection is used by the Commission to

assign frequencies for use by international broadcast stations, to grant authority to operate such stations and to determine if interference or adverse propagation conditions exist that may impact the operation of such stations. The Commission collects this information pursuant to 47 CFR part 73, subpart F. If the Commission did not collect this information, it would not be in a position to effectively coordinate spectrum for international broadcasters or to act for entities in times of frequency interference or adverse propagation conditions. Therefore, the information collection requirements are as follows:

FCC Form 309—Application for Authority To Construct or Make Changes in an International, Experimental Television, Experimental Facsimile, or a Developmental Broadcast Station—The FCC Form 309 is filed on occasion when the applicant is requesting authority to construct or make modifications to the international broadcast station.

FCC Form 310—Application for an International, Experimental Television, Experimental Facsimile, or a Developmental Broadcast Station License—The FCC Form 310 is filed on occasion when the applicant is submitting an application for a new international broadcast station.

FCC Form 311—Application for Renewal of an International or Experimental Broadcast Station License—The FCC Form 311 is filed by applicants who are requesting renewal of their international broadcast station licenses.

The Commission has not developed the FCC Forms 309, 310 and 311 due to a lack of budget funds and technical staff. The Commission stated previously that the above referenced applications will be available to applicants in the International Bureau Filing System ("MyIBFS") after implementation in the system. However, the Commission plans to develop a new Consolidated Licensing System (CLS) within the next five years that will replace MyIBFS. Therefore, the applications will be made available to the public in CLS instead of MyIBFS.

47 CFR 73.702(a) states that six months prior to the start of each season, licensees and permittees shall by informal written request, submitted to the Commission in triplicate, indicate for the season the frequency or frequencies desired for transmission to each zone or area of reception specified in the license or permit, the specific hours during which it desires to transmit to such zones or areas on each frequency, and the power, antenna gain,
