

employees, shall be appointed as experts and consultants under the authority of 5 U.S.C. 3109 and shall serve as special government employees.

Committee members shall, with the exception of travel and per diem for official travel, serve without compensation, unless authorized by the Secretary of Defense.

The Under Secretary of Defense (Acquisition, Technology, and Logistics) and the Assistant Secretary of Defense (Nuclear, Chemical and Biological Defense Programs) shall select the Committee's Chairperson and Vice Chairperson from the Committee membership at large.

The Secretary of Defense may approve the appointment of Committee members for one to four year terms of service; however, no member, unless authorized by the Secretary of Defense, may serve more than two consecutive terms of service. This same term of service limitation also applies to any DoD authorized subcommittees.

Each Committee member is appointed to provide advice on behalf of the government on the basis of his or her best judgment without representing any particular point of view and in a manner that is free from conflict of interest.

With DoD approval, the Committee shall be authorized to establish subcommittees and panels, as required and consistent with its mission. Establishment of subcommittees will be based upon a written determination, to include terms of reference, by the Secretary of Defense, the Deputy Secretary of Defense or the advisory committee's sponsor.

Such subcommittees or panels shall not work independently of the chartered Committee, and shall report their findings and advice solely to the Committee for full deliberation and discussion. Subcommittees or working groups have no authority to make decisions and recommendation verbally or in writing on behalf of the chartered Committee, nor can they report directly or release documents to the Agency or any Federal officers or employees not Committee Members.

All subcommittee members shall be appointed in the same manner as the Committee members; that is, the Secretary of Defense shall appoint subcommittee members even if the member in question is already a Committee member. Subcommittee members, with the approval of the Secretary of Defense, may serve a term of service on the subcommittee of one to four years; however, no member shall serve more than two consecutive terms of service on the subcommittee.

Subcommittee members, if not full-time or part-time government employees, shall be appointed to serve as experts and consultants under the authority of 5 U.S.C. 3109, and shall serve as special government employees, whose appointments must be renewed by the Secretary of Defense on an annual basis. With the exception of travel and per diem for official Committee related travel, subcommittee members shall serve without compensation. All subcommittees operate under the provisions of FACA, the Government in the Sunshine Act, governing Federal statutes and regulations, and governing DoD policies/procedures.

In addition, the Designated Federal Officer is required to be in attendance at all committee and subcommittee meetings; however, in the absence of the Designated Federal Officer, the Alternate Designated Federal Officer shall attend the meeting.

Publication of the Final National Wetland Plant List

AGENCY: U.S. Army Corps of Engineers, Department of Defense.

ACTION: Final Notice.

SUMMARY: The U.S. Army Corps of Engineers (Corps), as part of an interagency effort with the U.S. Environmental Protection Agency (EPA), the U.S. Fish and Wildlife Service (FWS) and the U.S. Department of Agriculture Natural Resources Conservation Service (NRCS), is announcing the availability of the final 2012 National Wetland Plant List (NWPL). The NWPL is used to determine whether the hydrophytic vegetation parameter is met when conducting wetland determinations under the Clean Water Act and the Wetland Conservation Provisions of the Food Security Act. Other applications of the list include wetland restoration, establishment, and enhancement projects. The list will become effective on June 1, 2012 and will be used in any wetland delineation performed after this date. Delineations received prior to this date may still use the 1988 list, or you may choose to use the 2012 list. Prior to the effective date, please reference which list was used on any wetland delineation/determination forms.

DATES: *Effective Date:* June 1, 2012.

ADDRESSES: U.S. Army Corps of Engineers, ATTN: CECW–CO–R (Attn: Karen Mulligan), 441 G Street NW., Washington, DC 20314–1000.

FOR FURTHER INFORMATION CONTACT: Karen Mulligan, Headquarters, U.S. Army Corps of Engineers, Operations and Regulatory Community of Practice, Washington, DC 20314–1000, by phone

at 202–761–4664 or by email at karen.mulligan@usace.army.mil.

SUPPLEMENTARY INFORMATION: The NWPL has undergone significant revisions since its inception in 1988. The latest review process began in 2008 and concluded with twelve rounds of review by regional and national panels and external botanical experts voting on the wetland indicator statuses and nomenclature changes of over 8,200 plants. Over 130,000 comments and votes have been received and reviewed, and a final list has been compiled.

In response to the January 6, 2011, **Federal Register** 76 CFR part 777, the Corps received 35 written comments (6 percent supported the proposal, 11 percent offered no objections or no comments on the proposal, 35 percent expressed opposition to the proposal, and 48 percent raised technical issues). In addition, 16,642 votes on 5,315 species were made by 377 individuals and were recorded on the NWPL Web site. These 377 people also placed 1,159 technical comments on the Web site. These represent about 15% of the total comments and votes received during the entire review process.

The wetland plant list used for Clean Water Act purposes was first published by the FWS in 1988 and contained 6,728 species. The latest list contains 8,200 species, an increase of 1,472 species, or 22 percent. The majority of the increase in the number of species is a result of new taxonomic interpretations. The new list also includes changes in plant indicator status (OBL, FACW, FAC, and FACU designations) from 1988 for 807 species, or 12 percent of the list (not including the new species added to the list). Because of changes in geographic boundaries between the former FWS 88 List and the updated list, these numbers are reasonable estimates but are not exact. The specific break-out of changes were: 35 percent (282 species) were rated wetter, 36 percent (290 species) were rated drier and the remaining 30 percent (235 species) were changes to the former FAC-group. The updating procedures designated a more stringent review of the former 1988 FAC-species. Of these former FAC-species, half were rated FACU and the other half was rated as FAC by a panel of 30 external professional botanists across all regions. Thus, the overall distribution of changes was nearly an equal split between species that received wetter ratings and those that received drier ratings.

The response to the technical comments can be found at: http://wetland_plants.usace.army.mil/. Policy-level comments are summarized below.
