BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2012-0022]

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated January 6, 2012, the Cass Scenic Railroad State Park (CASS) has petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR. FRA assigned the petition Docket Number FRA-2012-0022.

Specifically, CASS seeks a waiver of compliance for five freight cars from 49 CFR 215.303, which requires stenciling on restricted freight cars; and 49 CFR 231.1(a)3(i), which requires that "[t]he hand brake shall be so located that it

can be safely operated while car is in motion." In this same docket, CASS was previously granted a Special Approval for these same five overage cars, permitting them to continue in service beyond 50 years from the date of construction in accordance with 49 CFR 215.203(c).

CASS stated that two of the five cars in this petition were built as 40-foot steel frame cars to carry logs. Their exact ages are unknown but they are thought to have been constructed in the 1940s. The third car is a 40-foot flatcar built in the 1950s. The fourth car is a 40-foot tank car built in the 1950s. The fifth car is a 40-foot hopper car built in 1958. The hand brakes on these five cars cannot be used while the cars are in motion. The hand brakes can only be manually applied when the cars are at rest, using a ratchet lever at the end of the frame.

CASS stated that there are occasions where they used these cars in special charter trains for photographic purposes only. There are usually two or three such charter trains operated each year. Passengers are not carried on the cars or on the trains in which the cars are operated. The cars subject to this petition do not exceed a speed of 10 mph.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Web site:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Fax:* 202-493-2251.

- *Hand Delivery:* 1200 New Jersey Avenue SE., Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2012-0041]

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated April 4, 2012, the Metropolitan Transportation Authority Metro-North Commuter Railroad (MNCW) has petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 236. FRA assigned the petition Docket Number FRA-2012-0041.

MNCW seeks relief from the 2-year periodic testing requirements of the rules, standards, and instructions found at 49 CFR Sections 236.377, Approach locking; 236.378, Time locking; 236.379, Route locking; 236.380, Indication locking; and 236.381, Traffic locking on vital microprocessor-based systems. MNCW proposes to verify and test signal locking systems controlled by microprocessor-based equipment by use of alternative procedures every 4 years after initial baseline testing or program change as follows:

- Verify the cyclic redundancy check/ checksum/universal control number of the existing location's specific application logic to the previously tested version that is maintained in MNCW's Software Management Control Plan per requirements of 49 CFR 236.18.

- Test associated hardware connections outside the processor to verify that inputs from switch indication, searchlight signal (where provided), track indication, or other vital inputs to the processor yield the intended output to switches or other devices intended to be locked in the field.

- Analyze and compare results of each 4-year alternative test with the results of the baseline testing performed at the location, and submit results to FRA. MNCW submitted a list with their petition of 28 signal locations currently in service and subject to the relief being requested.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590.
