Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA-2010-0003; Internal Agency Docket No. FEMA-B-1158]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: On December 16, 2010, FEMA published in the **Federal Register** a proposed rule that contained an erroneous table. This notice provides corrections to that table, to be used in lieu of the information published at 75 FR 78654. The table provided here represents the flooding sources, location of referenced elevations, effective and modified elevations, and communities affected for the City of Newport News, Virginia. Specifically, it addresses the flooding sources Newmarket Creek, Newmarket Creek Tributary, Stoney Run, Stoney Run-Colony Pines Branch, and Stoney Run-Denbigh Branch.

DATES: Comments are to be submitted on or before November 26, 2012.

ADDRESSES: You may submit comments, identified by Docket No. FEMA-B-1158, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (email)

Luis.Rodriguez3@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (email) *Luis.Rodriguez3@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are minimum requirements. They should not be construed to mean that the community must change any existing ordinances that are more

stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings.

Correction

In the proposed rule published at 75 FR 78654, in the December 16, 2010, issue of the **Federal Register**, FEMA published a table under the authority of 44 CFR 67.4. The table, entitled "City of Newport News, Virginia" addressed the flooding sources Newmarket Creek, Newmarket Creek Tributary, Stoney Run, Stoney Run-Colony Pines Branch, and Stoney Run-Denbigh Branch. That table contained inaccurate information as to the location of referenced elevation, effective and modified elevation in feet, and/or communities affected for the flooding sources Stoney Run-Colony Pines Branch and Stoney Run-Denbigh Branch. In this notice, FEMA is publishing a table containing the accurate information, to address these prior errors. The information provided below should be used in lieu of that previously published.

State	City/town/county	Source of flooding	Location **	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL)	
				Existing	Modified
City of Newport News, Virginia					
Virginia	City of Newport News.	Newmarket Creek	Approximately 0.45 mile downstream of Hampton Roads Center Parkway.	None	+18
			Approximately 0.94 mile upstream of Hampton Roads Center Parkway.	None	+21
	City of Newport News.	Newmarket Creek	Approximately 1,287 feet downstream of Harpersville Road.	None	+24
			Approximately 0.56 mile upstream of Harpersville Road.	None	+26
	City of Newport News.	Newmarket Creek Tributary.	Approximately 765 feet downstream of Agusta Drive.	None	+22
			Approximately 167 feet upstream of Agusta Drive.	None	+22
	City of Newport News.	Stoney Run	Approximately 0.8 mile downstream of Old Courthouse Way.	+7	+8
			Approximately 0.56 mile upstream of Woodside Lane.	None	+47
	City of Newport News.	Stoney Run-Colony Pines Branch.	Approximately 776 feet downstream of Richneck Road.	None	+27
			Approximately 1,450 feet upstream of Windsor Castle Drive.	None	+40

State	City/town/county	Source of flooding	Location **	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL)	
				Existing	Modified
	City of Newport News.	Stoney Run-Denbigh Branch.	Just downstream of Richneck Road	None	+27
			Just downstream of McManus Boulevard	None	+33

* National Geodetic Vertical Datum.

Depth in feet above ground.

+ North American Vertical Datum.

^ Mean Sea Level, rounded to the nearest 0.1 meter.

** BFEs to be changed include the listed downstream and upstream BFEs, and include BFEs located on the stream reach between the referenced locations above. Please refer to the revised Flood Insurance Rate Map located at the community map repository (see below) for exact locations of all BFEs to be changed.

Send comments to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA-2008-0020; Internal Agency Docket No. FEMA-B-1083]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: On December 16, 2009, FEMA published in the **Federal Register** a proposed rule that included an erroneous flooding source name for the Town of Livonia in Pointe Coupee Parish, Louisiana. The flooding source name of Bayou Fardoche, in effect for the location approximately 0.47 mile downstream of I-190 and approximately 1.21 miles upstream of I-190 should have been listed as Bayou Grosse Tete.

DATES: Comments pertaining to the Bayou Grosse Tete Base Flood Elevations for the location

approximately 0.47 mile downstream of I-190 and approximately 1.21 miles upstream of I-190 are to be submitted on or before November 26, 2012.

ADDRESSES: You may submit comments, identified by Docket No. FEMA-B-1083, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (email)

Luis.Rodriguez3@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (email) *Luis.Rodriguez3@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are minimum requirements. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain

management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings.

Correction

In the proposed rule published at 74 FR 66602, in the December 16, 2009, issue of the **Federal Register**, FEMA published a table under the authority of 44 CFR 67.4. The table, entitled "Pointe Coupee Parish, Louisiana, and Incorporated Areas" addressed several flooding sources, including Bayou Fardoche. The proposed rule incorrectly listed the flooding source name, Bayou Fardoche, for the location approximately 0.47 mile downstream of I-190 and approximately 1.21 miles upstream of I-190. The correct flooding source name is Bayou Grosse Tete. This proposed rule correction is reopening the comment period for Bayou Grosse Tete, for the location approximately 0.47 mile downstream of I-190 and approximately 1.21 miles upstream of I-190, due to the error in listing the flooding source name in the previously published proposed rule at 74 FR 66602. (Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")
