

ICR Numbers: EPA ICR No. 2249.03, OMB Control No. 2070–0176.

ICR Status: This is a request to renew an existing approved collection. This ICR is scheduled to expire on October 31, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9 and included on the related collection instrument or form, if applicable.

Abstract: This is a renewal of an existing ICR covering the information collection activities associated with Tier 1 screening of chemicals under EPA's EDSP. The EDSP is established under section 408(p) of the Federal Food, Drug and Cosmetic Act (FFDCA) (21 U.S.C. 346a(p)), which requires EPA to develop a chemical screening program using appropriate validated test systems and other scientifically relevant information to determine whether certain substances may have hormonal effects. The EDSP consists of a two-tiered approach to screen chemicals for potential endocrine disrupting effects. The purpose of Tier 1 screening is to identify substances that have the potential to interact with the estrogen, androgen, or thyroid hormone systems using a battery of assays. Substances that have the potential to interact with estrogen, androgen or thyroid systems may proceed to Tier 2, which is designed to identify any adverse endocrine-related effects caused by the substance, and establish a quantitative relationship between the dose and that endocrine effect. Additional information about the EDSP is available at <http://www.epa.gov/endo>.

This ICR addresses the information collection activities for the initial list of chemicals screened under Tier 1 of the EDSP, and covers the full range of information collection activities associated with the issuance of and response to Tier 1 EDSP orders issued by EPA. The initial list was established in 2009, and consists of 67 pesticide active ingredients (PAIs) and pesticide inert. As the renewal of an ongoing information collection activity approved under the PRA, this ICR addresses the paperwork burden associated with the continuation of the activities over the next three years. As such, the paperwork burdens are adjusted to reflect the planned progression associated with the information

collection activities covered by the ICR. In addition, EPA has restructured the ICR to incorporate a presentation of the activities and related burden in a way that would match what is used in the ICR submission system.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to range between 204 and 4,919 hours per response. Burden is defined in 5 CFR 1320.3(b).

Respondents/Affected Entities: Entities potentially affected by this ICR are those that receive an EDSP test order issued by the Agency. Under FFDCA section 408(p)(5)(A), EPA "shall issue" EDSP test orders "to a registrant of a substance for which testing is required * * * or to a person who manufactures or imports a substance for which testing is required."

Frequency of Collection: On occasion.

Estimated No. of Respondents: 385.

Estimated Total Annualized Burden: 98,414 hours.

Estimated Total Annualized Cost: \$6,301,807.

Changes in Burden Estimates: There is a decrease of 63,011 hours in the total estimated annualized burden compared with that currently approved by OMB (i.e., from 161,415 hours to 98,404 hours). This is an adjustment that reflects the planned progression of the collection activities associated with the initial chemicals to be screened under Tier 1 of the EDSP.

Title: EPA’s Design for the Environment (DfE) Partner of the Year Awards Program.

ICR Status: This is a request to establish a new information collection activity.

Abstract: EPA has developed the Partner of the Year Awards to recognize DfE stakeholders who have furthered the goals of DfE through active and exemplary participation in and promotion of the DfE program. Making DfE’s mission known to the widest possible audience, through its safer product label and in other forms of communication, is critical to fully realizing the program’s goals of protecting human health and the environment, promoting a sustainable economy, and creating green jobs, especially in the small business sector.

The Partner of the Year Awards will be an annual event, with recognition for DfE stakeholder organizations from five broad categories: (1) Formulators/product manufacturers (of both consumer and institutional/industrial (I/I) products), (2) purchasers and distributors, (3) retailers, (4) influencers (e.g., non-governmental organizations, including environmental and health advocates, trade associations, academia, sports teams, and others), and (5) innovators (e.g., chemical manufacturers, technology developers, and others). Within these categories and based on the criteria, DfE may elect to give additional awards in the subcategories of “small business” and

“sustained excellence.” This information collection activity addresses the reporting burden associated with making application to EPA for recognition in the Partner of the Year Awards program.

Responses to this information collection are voluntary. Respondents may claim all or part of a notice as CBI. EPA will disclose information that is covered by a CBI claim only to the extent permitted by, and in accordance with, the procedures in 40 CFR part 2.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average about 15 hours per response. Burden is defined in 5 CFR 1320.3(b).

Respondents/Affected Entities: Entities potentially affected by this action are establishments engaged in the production, use, and/or advancement of safer chemicals, that have furthered the goals of DfE through active and exemplary participation in and promotion of the program, and that wish to receive recognition for their achievements.

Frequency of Collection: On occasion.

Estimated average number of responses for each respondent: 1.

Estimated No. of Respondents: 110.

Estimated Total Annual Burden on Respondents: 1,650 hours.

Estimated Total Annual Costs: \$69,790.

Changes in Burden Estimates: Since this is a new ICR, change in respondent burden is not applicable.
