SUPPLEMENTARY INFORMATION:

1. Proposed Action. Donlin Gold LLC is proposing the development of an open pit, hardrock gold mine located 277 miles west of Anchorage, 145 miles northeast of Bethel, and 10 miles north of the community of Crooked Creek. The proposed project would require approximately 3 to 4 years to construct with a projected mine life of approximately 27.5 years. Major project components include excavation of an open pit, that ultimately would be approximately 2.2 miles long by 1 mile wide by 1,850 feet deep; a waste treatment facility (tailings impoundment) approximately 1 mile long, and ultimately covering 2,350 acres; a waste rock facility covering approximately 2,300 acres; a mill facility processing approximately 59,000 short tons of ore per day; a natural gasfired power plant with a total connected load of 227 MW, supplied by a 313mile, small-diameter (approximately 14inches), natural gas pipeline from the west side of Cook Inlet to the mine site; and transportation infrastructure including a 5,000-foot airstrip, a 30mile-long road from the mine site to a new barge landing near Jungjuk Creek on the Kuskokwim River, and barge terminal facilities in Bethel. The proposed mine and related facilities would have a total foot print of approximately 16,300 acres. There is currently no road or rail access to the site, which is isolated from existing power and other related infrastructure.

The pipeline route would originate at the Beluga National Gas Pipeline, with a single compressor station at milepost 5. The route proceeds north to the Skwentna River, continuing alongside the Skwentna River to Puntilla Lake. It then crosses the Alaska Range through Rainy Pass and Rohn, before turning southwest to Farewell. The route then runs west along the north side of the Alaska Range to cross the Kuskokwim River at approximately Devil's Elbow. The last 80 miles follow ridgelines north
