It also prescribes requirements governing holders of the specific licenses. Some of the requirements are for information which must be submitted in an application for a certificate of registration for a sealed source and/or device, records which must be kept, reports which must be submitted, and information which must be forwarded to general licensees and persons exempt from licensing. As mentioned, 10 CFR part 32 also prescribes requirements for the issuance of certificates of registration (concerning radiation safety information about a product) to manufacturers or initial transferors of sealed sources and devices. Submission or retention of the information is mandatory for persons subject to the 10 CFR part 32 requirements. The information is used by the NRC to make licensing and other regulatory determinations concerning the use of radioactive byproduct material in products and devices.

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC-2012-0245]

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on November 14, 2012 (77 FR 69664).

1. *Type of submission, new, revision, or extension:* New.

2. *The title of the information collection:* Voluntary Reporting of Planned Topical Report Submissions.

3. *Current OMB approval number:* 3150-XXXX.

4. *The form number if applicable:* N/A.

5. *How often the collection is required:* Annually.

6. *Who will be required or asked to report:* Organizations submitting topical reports for review by the NRC staff.

7. *An estimate of the number of annual responses:* 10.

8. *The estimated number of annual respondents:* 10.

9. *An estimate of the total number of hours needed annually to complete the requirement or request:* 1,000 hours

10. *Abstract:* The NRC collects planning information on topical report (TR) submissions from nuclear power plant owner groups (OGs), vendors, the Electric Power Research Institute, and the Nuclear Energy Institute (NEI) in accordance with agency guidance to process requests for reviews of TRs. A TR is a stand-alone report containing technical information about a nuclear power plant safety topic that can be submitted to the NRC for its review and approval. A TR improves the efficiency of the licensing process by allowing the staff to review a proposed methodology, design, operational requirements, or other safety-related subjects that will be used by multiple licensees following approval by referencing the approved TR. The TR provides the technical basis for a licensing action. Vendors have voluntarily submitted information related to planned submittals of TRs on an annual basis. As part of its ongoing efforts to improve the effectiveness and efficiency of the TR program, the agency requires up-to-date information on planned TR submittals.

I. Notice of Issuance

The BMRC reactor is located at the UB in Buffalo, NY. The reactor is a PULSTAR heterogeneous open-pool type water cooled reactor. The reactor operated from March 24, 1961 until June 23, 1994. During operation, the reactor used 6% enriched uranium dioxide fuel clad in zirconium-alloy. The UB submitted the DP for the reactor to the NRC in a letter dated February 17, 2012 (ADAMS accession no. ML120540187), as supplemented by letters dated June 20, 2012 (ADAMS accession no. ML121870132), September 21, 2012 (ADAMS accession no. ML122780454), and October 15, 2012 (ADAMS accession no. ML12297A237).

Pursuant to sections 20.1405 and 50.82(b)(5) of Title 10 of the *Code of Federal Regulations* (10 CFR), the NRC published a notice and solicitation of comments for this DP in the **Federal Register** entitled, "License Amendment Request From The State University of New York, University of Buffalo Reactor Facility," on May 10, 2012 (77 FR 27487). No comments were received in response to this notice.

Subsequently, the NRC conducted a safety evaluation of the proposed DP (ADAMS accession no. ML12286A352). Based on this safety evaluation, the NRC concluded that, pursuant to 10 CFR 50.82(b)(5), the DP demonstrates that the proposed decommissioning will be performed in accordance with the Commission's regulations and will not be inimical to the common defense and security or to the health and safety of the public. Therefore, the Commission approved, by amendment to Facility License R-77, the DP subject to the safety evaluation.

The NRC is publishing this notice announcing the issuance of the amendment to Facility License R-77 pursuant to 10 CFR 2.106(a)(1), because a notice of proposed action regarding this amendment had been previously published.

Dated at Rockville, Maryland, this 11th day of February, 2013.

For the Nuclear Regulatory Commission.

Andrew Persinko,

Deputy Director Decommissioning and Uranium Recovery, Licensing Directorate, Division of Waste Management and Environmental Protection, Office of Federal and State Materials, and Environmental Management Programs.
