

avoid antenna structures and other obstacles, and adopts rules to permit ground testing of aviation data link test systems. However, in this R&O, the Commission declined to authorize remote monitoring of certain automated ground stations.

Section 87.287(b) requires that before submitting an application for an aircraft data link land test station, an applicant must obtain written permission from the licensee of the aeronautical enroute stations serving the areas in which the aircraft data link land test station will operate on a co-channel basis. The Commission may request an applicant to provide documentation as to this fact.

The written permission will aid the Commission in ensuring that licensees are complying with its policies and rules, while allowing the owners of antenna structures and other aviation obstacles to use Audio Visual Warning Systems (AVWS) stations, thereby helping aircraft avoid potential collisions and enhancing aviation safety, without causing harmful interference to other communications.
