

applications, applicant may file the application and the certification and request electronically using the USPTO electronic filing system, EFS-Web, and selecting the document description of "Certification and Request for Missing Parts Pilot" for the certification and request on the EFS-Web screen. Form PTO/AIA/421 is available on the USPTO Web site at <http://www.uspto.gov/forms/aia0421.pdf>. Information regarding EFS-Web is available on the USPTO Web site at <http://www.uspto.gov/ebs/index.jsp>.

The utility application including the certification and request to participate in the pilot program may also be filed by mail (e.g., by "Express Mail" in accordance with 37 CFR 1.10) or hand-carried to the USPTO. However, applicants are advised that, effective November 15, 2011, as provided in the Leahy-Smith America Invents Act, a new additional fee of \$400.00 for a non-small entity (\$200.00 for a small entity) is due for any nonprovisional utility patent application that is not filed by EFS-Web. See Public Law. 112–29, § 10(h), 125 Stat. 283, 319 (2011). This non-electronic filing fee is due on filing of the utility application or within the two-month (extendable) time period to reply to the Notice to File Missing Parts of Nonprovisional Application. Applicants will not be given the twelve-month time period to pay the non-electronic filing fee. Therefore, utility applicants are strongly encouraged to file their utility applications via EFS-Web to avoid this additional fee.

For plant patent applications, applicant must file the application including the certification and request to participate in the pilot program by mail or hand-carried to the USPTO since plant patent applications cannot be filed electronically using EFS-Web. See *Legal Framework for Electronic Filing System Web* (EFS-Web), 74 FR 55200 (Oct. 27, 2009), 1348 *Off. Gaz. Pat. Office* 394 (Nov. 24, 2009).

II. *Processing of Requests*: If applicant satisfies the requirements (discussed above) on filing of the nonprovisional application and the application is in condition for publication, the USPTO will send applicant a Notice to File Missing Parts of Nonprovisional Application that sets a twelve-month (non-extendable) time period to submit the search fee, the examination fee, any excess claims fees (under 37 CFR 1.16(h)–(j)), and the surcharge under 37 CFR 1.16(f) (for the late submission of the search fee and examination fee). The twelve-month time period will run from the mailing date, or notification date for e-Office Action participants, of the Notice to File Missing Parts. For

information on the e-Office Action program, see *Electronic Office Action*, 1343 *Off. Gaz. Pat. Office* 45 (June 2, 2009), and http://www.uspto.gov/patents/process/status/e-Office_Action.jsp. After an applicant files a timely reply to the Notice to File Missing Parts within the twelve-month time period and the nonprovisional application is completed, the nonprovisional application will be placed in the examination queue based on the actual filing date of the nonprovisional application.

For a detailed discussion regarding treatment of applications that are not in condition for publication, processing of improper requests to participate in the program, and treatment of authorizations to charge fees, see *Pilot Program for Extended Time Period To Reply to a Notice to File Missing Parts of Nonprovisional Application*, 75 FR 76401, 76403–04 (Dec. 8, 2010), 1362 *Off. Gaz. Pat. Office* 44, 47–49 (Jan. 4, 2011).

III. *Important Reminders*: Applicants are reminded that the disclosure of an invention in a provisional application should be as complete as possible because the claimed subject matter in the later-filed nonprovisional application must have support in the provisional application in order for the applicant to obtain the benefit of the filing date of the provisional application.

Furthermore, the nonprovisional application as originally filed must have a complete disclosure that complies with 35 U.S.C. 112(a) which is sufficient to support the claims submitted on filing and any claims submitted later during prosecution. New matter cannot be added to an application after the filing date of the application. See 35 U.S.C. 132(a). In order to be accorded a filing date, a nonprovisional application must include a specification concluding with at least one claim as prescribed by 35 U.S.C. 112 and a drawing as prescribed by 35 U.S.C. 113. See 35 U.S.C. 111(a). While only one claim is required in a nonprovisional application for filing date purposes and applicant may file an amendment adding additional claims later during prosecution, applicant should consider the benefits of submitting a complete set of claims on filing of the nonprovisional application. This would reduce the likelihood that any claims added later during prosecution might be found to contain new matter. Also, if a patent is granted and the patentee is successful in litigation against an infringer, provisional rights to a reasonable royalty under 35 U.S.C. 154(d) may be available only if the claims that are

published in the patent application publication are substantially identical to the patented claims that are infringed, assuming timely actual notice is provided. Thus, the importance of the claims that are included in the patent application publication should not be overlooked.

Applicants are also advised that the extended missing parts period does not affect the twelve-month priority period provided by the Paris Convention for the Protection of Industrial Property (Paris Convention). Thus, any foreign filings must still be made within twelve months of the filing date of the provisional application if applicant wishes to rely on the provisional application in the foreign-filed application or if protection is desired in a country requiring filing within twelve months of the earliest application for which rights are left outstanding in order to be entitled to priority.

For additional reminders, see *Pilot Program for Extended Time Period To Reply to a Notice to File Missing Parts of Nonprovisional Application*, 75 FR 76401, 76405 (Dec. 8, 2010), 1362 *Off. Gaz. Pat. Office* 44, 50 (Jan. 4, 2011).

Teresa Stanek Rea,

Deputy Under Secretary of Commerce for Intellectual Property and Deputy Director of the United States Patent and Trademark Office.
