Privacy Assessment: No impact(s).

Needs and Uses: The Federal Communications Commission ("Commission") is seeking approval from Office of Management and Budget (OMB) to revise OMB Control No. 3060-1153 to reflect new and/or modified information collections as a result of an Order on Reconsideration titled "In the Matter of Amendment of Part 27 of the Commission's Rules to Govern the Operation of Wireless Communications Services in the 2.3 GHz Band; Establishment of Rules and Policies for the Digital Audio Radio Satellite Service in the 2310-2360 MHz Frequency Band," WT Docket No. 07-293, IB Docket No. 95-91 (FCC 12-130).

On October 17, 2012, the Commission adopted and released an Order on Reconsideration that addressed five petitions for reconsideration of the 2010 WCS R&O and SDARS 2nd R&O. The petitions sought reconsideration or clarification of the Commission's decisions in the 2010 WCS R&O and SDARS 2nd R&O regarding the technical and policy rules governing the operation of WCS stations in the 2305-2320 MHz and 2345-2360 MHz bands and the operation of SDARS terrestrial repeaters in the 2320-2345 MHz band.

As part of the Order on Reconsideration, the Commission adopted proposals to relax the notification requirements for SDARS licensees under Sections 25.263(b) & (c) of the Commission's rules. As adopted in the 2010 WCS R&O and SDARS 2nd R&O, Section 25.263(b) requires SDARS licensees to share with WCS licensees

certain technical information at least 10 business days before operating a new repeater, and at least 5 business days before operating a modified repeater. Under Section 25.263(c), SDARS licensees operating terrestrial repeaters must maintain an accurate and up-to-date inventory of all terrestrial repeaters, including the information set forth in 25.263(c)(2) for each repeater, which must be made available to the Commission upon request.

The following modified information collections are contained in the Order on Reconsideration:

47 CFR 25.263(b)—SDARS licensees are required to provide informational notifications as specified in 25.263, including a requirement that SDARS licensees must share with WCS licensees certain technical information at least 10 business days before operating a new repeater, and at least 5 business days before operating a modified repeater; exempting modifications that do not increase the predicted power flux density at ground level by more than one decibel (dB) (cumulative) and exempting terrestrial repeaters operating below 2 watts equivalent isotropically radiated power.

47 CFR 25.263(c)—SDARS licensees operating terrestrial repeaters must maintain an accurate and up-to-date inventory of terrestrial repeaters operating above 2 W EIRP, including the information set forth in 25.263(c)(2) for each repeater, which shall be made available to the Commission upon request. Requirement can be satisfied by maintaining inventory on a secure Web site that can be accessed by authorized Commission staff.

The information collection requirements contained in Section 25.263 are necessary to determine the potential of radiofrequency interference from SDARS terrestrial repeaters to WCS stations. Without such information, the Commission would be unable to fulfill its statutory responsibilities in accordance with the Communications Act of 1934, as amended.

OMB Control Number: 3060–1084.

Title: Rules and Regulations Implementing Minimum Customer Account Record Exchange Obligations on All Local and Interexchange Carriers (CARE).

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 2,621 respondents; 574,468 responses.

Estimated Time per Response: 1 minute (.017 hours) to 20 minutes (.33 hours).

Frequency of Response: Recordkeeping and annual reporting requirements.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for these information requirements are found in sections 1–4, 201, 202, 222, 258, and 303(r) of the Communications Act of 1934, as amended; 47 U.S.C. 151, 154, 201, 202, 222, 258, and 303(r).

Total Annual Burden: 47,693 hours. Total Annual Cost: None.

Nature and Extent of Confidentiality: Confidentiality is not an issue as individuals and/or households are not required to provide personally identifiable information.

Privacy Impact Assessment: No impact(s).

Needs and Uses: In the 2005 Report and Order and Further Notice of Proposed Rulemaking, In the Matter of Rules and Regulations Implementing Minimum Customer Account Record Exchange Obligations on All Local and Interexchange Carriers (2005 Report and Order), CG Docket No. 02–386, FCC 05–29, which was released on February 25, 2005, the Commission adopted rules governing the exchange of customer account information between local exchange carriers (LECs) and interexchange carriers (IXCs). The Commission concluded that mandatory, minimum standards are needed in light of record evidence demonstrating that information needed by carriers to execute customer requests and properly bill customers is not being consistently provided by all LECs and IXCs.

Specifically, the 2005 Report and Order requires LECs to supply customer account information to IXCs when: (1) The LEC places an end user on, or removes an end user from, an IXC's network; (2) an end user presubscribed to an IXC makes certain changes to her account information via her LEC; (3) an IXC requests billing name and address information for an end user who has usage on an IXC's network but for whom the IXC does not have an existing account; and (4) a LEC rejects an IXC-initiated PIC order. The 2005 Report and Order required IXCs to notify LECs when an IXC customer informs an IXC directly of the customer's desire to change IXCs. In the accompanying Further Notice of Proposed Rulemaking, the Commission sought comment on whether to require the exchange of customer account information between LECs. In December 2007, the Commission declined to adopt

mandatory LEC-to-LEC data exchange requirements.
