BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 51 and 54

[NRC-2008-0608]

RIN 3150-AI42

Preparation of Environmental Reports for Nuclear Power Plant License Renewal Applications

AGENCY: Nuclear Regulatory Commission.

ACTION: Regulatory guide; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing Revision 1 to Regulatory Guide (RG) 4.2, Supplement 1 (RG 4.2S1), "Preparation of Environmental Reports for Nuclear Power Plant License Renewal Applications." This regulatory guide provides guidance to applicants in the preparation of environmental reports that are submitted with the application for the renewal of a nuclear power plant operating license. Applicants should use this regulatory guide when preparing an environmental report for license renewal to ensure that the information they submit to the NRC is complete and facilitates the NRC staff's review.

DATES: June 20, 2013.

ADDRESSES: Please refer to Docket ID NRC-2008-0608 when contacting the NRC about the availability of information regarding this document. You may access information related to this document, which the NRC possesses and is publicly available, using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0608. Address questions about NRC dockets to Carol Gallagher; telephone: 301-492-3668; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may access publicly available documents online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and

then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. Revision 1 of Regulatory Guide 4.2, Supplement 1, is available in ADAMS under Accession No. ML13067A354.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's Public Document Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

FOR FURTHER INFORMATION CONTACT:

Emmanuel Sayoc, telephone: 301-415-1924, email: Emmanuel.Sayoc@nrc.gov, or Edward O'Donnell, telephone: 301-251-7455, email:

Edward.Odonnell@nrc.gov. U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is issuing a revision to an existing regulatory guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The NRC is publishing a final rule, "Revisions to Environmental Review for Renewal of Nuclear Power Plant Operating Licenses" (RIN 3150-AI42; NRC-2008-0608), in the Rules and Regulations section of this issue of the **Federal Register** that amends its environmental protection regulations by updating the Commission's 1996 findings on the environmental impacts of renewing the operating license of a nuclear power plant. The NRC complies with the National Environmental Policy Act (NEPA) through the implementation of its regulations in Part 51 of Title 10 of the *Code of Federal Regulations* (10 CFR) (see Table B-1 in Appendix B to Subpart A of 10 CFR part 51). The environmental reports submitted by license renewal applicants are part of the process set forth in 10 CFR part 51. The final rule incorporates lessons learned and knowledge gained from license renewal environmental reviews conducted by the NRC since 1996. Specifically, the final rule amends Table

B-1 by redefining the number and scope of the environmental impact issues that must be considered by the NRC during license renewal environmental reviews and amends other related regulations in 10 CFR part 51 (*i.e.*, 10 CFR 51.53, 51.71, and 51.95). For renewal of nuclear power plant operating licenses, RG 4.2S1, Revision 1, provides guidance to applicants in the preparation of environmental reports.

Also in the Rules and Regulations section of this issue of the **Federal Register**, the NRC is publishing Revision 1 to NUREG-1437, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants" (ADAMS Accession Nos. ML13106A241, ML13106A242, and ML13106A244); and Revision 1 to NUREG-1555, "Standard Review Plans for Environmental Reviews for Nuclear Power Plants, Supplement 1: Operating License Renewal" (ADAMS Accession No. ML13106A246).

II. Further Information

The NRC made the draft of Revision 1 of RG 4.2S1 available for public comment as Draft Guide (DG)-4015 on July 31, 2009 (74 FR 38238), with a 75-day public comment period. The NRC extended the public comment period for another 90 days, with a closing date of January 12, 2010 (74 FR 51522; October 7, 2009). The NRC received 3 public comments from the Nuclear Energy Institute, New York State Office of the Attorney General, and the United States Environmental Protection Agency. The NRC staff's response to public comments is available in ADAMS under Accession No. ML13067A355.

III. Congressional Review Act

This regulatory guide is a rule as designated in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as designated in the Congressional Review Act.

IV. Backfitting and Issue Finality

This regulatory guide provides the NRC's first guidance on compliance with the revised provisions of 10 CFR part 51. The statement of considerations for the final rule that amended 10 CFR part 51 explains that issuance of the final rule does not constitute "backfitting" as defined in 10 CFR 50.109(a)(1) of the Backfit Rule and is not otherwise inconsistent with the applicable issue finality provisions in 10 CFR part 52 (*see* Section XIX, "Backfitting and Issue Finality," of the final rule). The first issuance of guidance on a new rule does not

constitute backfitting, inasmuch as the guidance must be consistent with the regulatory requirements in the new rule and the backfitting considerations applicable to the new rule must, as a matter of logic, also be applicable to this newly-issued guidance. Therefore, issuance of this new regulatory guide does not constitute issuance of “new” guidance within the meaning of the definition of “backfitting” in 10 CFR 50.109(a)(1). Further, issuance of this guidance, like issuance of the final rule itself, does not constitute “backfitting” as defined in 10 CFR 50.109(a)(1) of the Backfit Rule nor does the issuance of this new regulatory guide, by itself, constitute an action inconsistent with any of the issue finality provisions in 10 CFR part 52.

Dated at Rockville, Maryland, this 23rd day of April, 2013.

For the Nuclear Regulatory Commission.

Thomas H. Boyce,

*Chief, Regulatory Guide Development Branch,
Division of Engineering, Office of Nuclear
Regulatory Research.*

[NRC-2008-0608]

RIN 3150-AI42

License Renewal of Nuclear Power Plants; Generic Environmental Impact Statement and Standard Review Plans for Environmental Reviews

AGENCY: Nuclear Regulatory
Commission.

ACTION: NUREG-1437 and NUREG-
1555; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is updating and revising NUREG-1437, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants” (GEIS), which the NRC issued in May 1996. The revised GEIS provides the technical basis for amending certain NRC environmental protection regulations. The NRC has also revised NUREG-1555, Supplement 1, “Standard Review Plans for Environmental Reviews for Nuclear Power Plants, Supplement 1: Operating License Renewal” (ESRP). The ESRP serves as a guide to the NRC staff in preparing a plant-specific supplemental environmental impact statement to the GEIS. This document is announcing the

issuance of NUREG-1437, Revision 1, and NUREG-1555, Revision 1.

DATES: NUREG-1437 and NUREG-1555 are effective June 20, 2013.

ADDRESSES: Please refer to Docket ID NRC-2008-0608 when contacting the NRC about the availability of information regarding this document. You may access information related to this document, which the NRC possesses and is publicly available, using any of the following methods:

- **Federal Rulemaking Web site:** Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0608. Address questions about NRC dockets to Carol Gallagher; telephone: 301-492-3668; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- **NRC's Agencywide Documents Access and Management System (ADAMS):** You may access publicly available documents online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS Accession No. for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced. The ADAMS Accession Nos. for the GEIS, NUREG-1437, are as follows: ML13107A023 for the package, ML13106A241 for Volume 1, ML13106A242 for Volume 2, and ML13106A244 for Volume 3. The ADAMS Accession No. for the ESRP, NUREG-1555, is ML13106A246.

- **NRC's PDR:** You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Mr. Emmanuel Sayoc, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 1-800-368-5642, email: Emmanuel.Sayoc@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Discussion

In the Rules and Regulations section of this issue of the **Federal Register**, the NRC published a final rule, “Revisions to Environmental Review for Renewal of Nuclear Power Plant Operating Licenses” (RIN 3150-AI42), that is amending its environmental protection

regulations by updating and revising the Commission's 1996 findings on the environmental impacts of renewing the operating license of a nuclear power plant. The final rule redefines the number and scope of the environmental impact issues that must be addressed by the NRC during license renewal environmental reviews. Most of the amendments made by this final rule are based upon Revision 1 to the GEIS, which incorporates lessons learned and knowledge gained from license renewal environmental reviews conducted by the NRC since 1996.

Revision 1 to the GEIS is intended for use by license renewal applicants and the NRC staff. The NRC published the draft Revision 1 to the GEIS on July 31, 2009 (74 FR 38239), for a 75-day public comment period, ending on October 14, 2009. The NRC later extended the comment period to January 12, 2010 (74 FR 51522; October 7, 2009).

The intent of the GEIS is to determine which issues would result in the same impact at all nuclear power plants and which issues could result in different levels of impact at different plants and thus require a plant-specific analysis for impact determinations. Revision 1 to the GEIS identifies 78 environmental impact issues for consideration in license renewal environmental reviews, 59 of which have been determined to be generic to all plant sites. The GEIS also evaluates a full range of alternatives to the proposed action. For most impact areas, the proposed action (i.e., renewal of the plant's operating license) would have impacts that would be similar to or less than impacts of the alternatives, in large part because most alternatives would require new power plant construction, whereas the proposed action would not.

The NUREG-1437 consisted of two volumes when first issued by the NRC in 1996—the first volume consisting of the primary text and the second volume consisting of the GEIS appendices. Revision 1 of NUREG-1437 expands the GEIS to three volumes to meet internal NRC publication requirements for NUREG documents. Volume 1 contains the primary text of the GEIS; Volume 2 contains Appendix A, which consists of public comments and the NRC's responses thereto; and Volume 3 contains the remainder of the GEIS appendices.

The ESRP provides guidance to NRC staff in implementing the provisions in Part 51 of Title 10 of the *Code of Federal Regulations* (10 CFR), “Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions,” when conducting an environmental review for the renewal of
