II. Regulatory History and Information

The Coast Guard published an ANPRM entitled “Safety and Environmental Management System Requirements for Vessels on the U.S. Outer Continental Shelf,” on September 10, 2013 (78 FR 55230) proposing to promulgate regulations that will require all domestic and foreign-flagged vessels engaged in OCS activities to develop, implement, and maintain a SEMS that incorporates the management program and principles of API RP 75. This requirement would apply to MODUs, well stimulation vessels, FPSOs, shuttle tankers, OSVs, accommodation vessels, and other vessels engaged in OCS activities. A Coast Guard-required SEMS would help to prevent accidents, injuries, and environmental damage by reducing the probability and severity of uncontrolled releases and other undesirable events. By incorporating the management program and principles of API RP 75 as the basis for the Coast Guard’s SEMS requirements for vessels, this regulatory action would leverage industry safety expertise and harmonize with BSEE’s regulations for designated lease operators. All comments on this ANPRM were originally due by December 9, 2013.

III. Background and Purpose

On October 4, 2013, we received a letter from Offshore Marine Service Association (OMSA) requesting an extension of the comment period. It noted additional time was desired to review the proposal and develop answers to the sixteen questions listed in the ANPRM. The U.S. Coast Guard is extending the public comment period, as requested, to ensure stakeholders have adequate time to submit complete responses.

IV. Authority

This notice is issued under authority of 5 U.S.C. 552(a).

Dated: November 4, 2013.
