**Information Collection Request Title:
Rural Health Network Development
Planning Performance Improvement
and Measurement System Database**

OMB No. 0915-xxxx—[NEW]

Abstract: The purpose of the Rural Health Network Development Planning (Network Planning) program, authorized by Section 330A(f) of the Public Health Service Act, 42 U.S.C. 254c(f), as amended by section 201, Public Law 107-251 of the Health Care Safety Net Amendments of 2002, is to assist in the development of an integrated healthcare network, if the network participants do not have a history of collaborative efforts.

The Network Planning program helps to promote the planning and development of healthcare networks in order to: (i) Achieve efficiencies; (ii) expand access to, coordinate, and improve the quality of essential health care services; and (iii) strengthen the rural health care system as a whole. This program brings together key parts of a rural health care delivery system, particularly those entities that may not have collaborated in the past under a formal relationship, to work together to establish and improve local capacity and coordination of care. This grant program supports one year of planning with the primary goal of helping networks create a foundation for their infrastructure and focusing member efforts to address important regional or local community health needs.

Need and Proposed Use of the Information: For this program, performance measures were drafted to provide data to the program and to enable HRSA to provide aggregate program data. These measures cover the principal topic areas of interest to the Office of Rural Health Policy, including

(a) network infrastructure; (b) network collaboration; (c) sustainability; and (d) network assessment. Several measures will be used for this program.

Likely Respondents: The respondents would be Network Planning grant recipients.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
