A. Overview of Information Collection

Title of Information Collection: The Impact of Housing and Services Interventions on Homeless Families—36-month Follow-up Data Collection.

OMB Approval Number: 2528-0259.

Type of Request: Revision of a currently approved collection.

Form Number: None.

Description of the need for the information and proposed use:

The 36-Month Head of Household Follow-up Survey Instrument and the 36-Month Child Data Collection Instruments will support the collection of data from families enrolled in the Family Options Study. The Family Options Study, formerly referred to as The Impact of Housing and Services Interventions on Homeless Families, was launched by HUD in 2008 in response to Senate Report 109-109 for the FY 2006 Transportation, Treasury, the Judiciary, Housing and Urban Development and Related Agencies Appropriations Bill, which directed HUD to “undertake research to ascertain the impact of various service and housing interventions in ending homelessness for families.” The Family

Options Study is comparing several combinations of housing assistance and services in a rigorous, multi-site experiment to determine which interventions work best to promote housing stability, family preservation, child well-being, adult well-being, and self-sufficiency. Between 2010 and 2012, over 2,300 families in twelve communities enrolled in the study. Prior rounds of data collection from the adult head of household have been conducted at the point of study enrollment/random assignment, and eighteen (18) months following the date of study enrollment/random assignment. Extensive data collection from a sample of children within study families has also been conducted by the research team with funding from the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD). This next phase of data collection in the Family Options Study will support the continued collection of data from study families 36 months following the date of study enrollment/random assignment. Given the length of time which families are eligible to remain in the interventions being tested (one of the four interventions being studied can serve families for up to 18 months, and a second can serve families for up to 24 months), this final wave of data is critical to understanding how families fare after an intervention ends, and whether the same interventions that are effective in the short-term (18 months), are also effective in the longer-term (36 months).

Respondents (i.e. affected public): Study households.

Form	Respondent sample	Number of respondents	Average time to complete (minimum, maximum) in minutes	Frequency	Total burden (hours)

36-Month Child Data Collection	Up to two children per family	2,800	60 (50–70)	1	2,800
