Permit No. 14450, issued on March 4, 2014 (79 FR 13042), authorizes the permit holder to take all cetacean species that occur in U.S. and international waters of the Atlantic Ocean, Gulf of Mexico and Caribbean Sea by harassment during aerial and vessel-based line-transect sampling, acoustic sampling, behavioral observations, and vessel-based photo-identification and biopsy sampling. Tissue samples collected in other countries may be imported into the U.S. The permit is valid for five years from the date of issuance.

The permit holder is requesting the permit be amended to include authorization for takes by harassment during satellite tagging to support

NMFS stock assessment research on ESA-listed large whales that occur in U.S. and international waters of the western North Atlantic. Up to four attempts would be made to attach a tag to an animal. Directed satellite tagging efforts would be conducted to tag 20 sperm whales and 5 North Atlantic right whales. Opportunistic tagging would occur of 10 fin, 5 blue, 5 sei, and 10 humpback whales when encountered during other SEFSC assessment surveys. Only adults would be tagged. The expiration date of the permit would not change.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.
