

June and November sessions of WP.29) subject to the agreement of WP.29.

D. Compendium of Candidate GTRs

Article 5 of the 1998 Global Agreement provides for the creation of a compendium of candidate technical regulations submitted by the Contracting Parties. To date, NHTSA has submitted several FMVSSs for inclusion in this Compendium. These FMVSSs have all been listed in the Compendium after an affirmative vote of the Executive Committee of the 1998 Global Agreement.

The FMVSS currently listed in the Compendium include:

- FMVSS No. 108: Lamps, Reflective Devices, and Associated Equipment
- FMVSS No. 135: Passenger Car Brake Systems
- FMVSS No. 139: New Pneumatic Radial Tires for Light Vehicles
- FMVSS No. 202a: Head Restraints
- FMVSS No. 205: Glazing Materials
- FMVSS No. 213: Child Restraint Systems
- EPA and DOT programs for Light-duty Vehicle Greenhouse Gas Emissions Standards and Fuel Efficiency Standards for Medium and Heavy-Duty Engines and Vehicles
- EPA and NHTSA Programs for Greenhouse Gas Emissions Standards and Fuel Efficiency Standards for Medium and Heavy-Duty Engines and Vehicles
- EPA and NHTSA Programs for Revisions and Additions to the Motor Vehicle Fuel Economy Label: New Fuel Economy and Environment Labels for a New Generation of Vehicles

No additional candidate technical regulations have been added as of the publication of this notice.

IV. Request for Comments

NHTSA invites public comments on the various activities outlined in this notice. As discussed in Appendix C of 49 CFR part 553, if NHTSA votes “yes” on a GTR, the agency will publish a notice requesting public comment on adopting the regulation as a U.S. standard. Any decision by NHTSA whether to issue a final rule adopting the regulation or to issue a notice terminating consideration of that regulation will be made in accordance with applicable U.S. law and only after careful consideration and analysis of public comments. In the event that NHTSA issues a final rule based on a GTR and, due to the public comments and/or new information and data, the final rule significantly differs from the GTR, NHTSA will consider seeking amendments to the GTR in an effort to

achieve consistency. The agency plans to issue individual notices based on each GTR as it is established by WP.29 and will consider additional detailed comments at that time.

Claude H. Harris,

Acting Associate Administrator for Rulemaking.

Internal Revenue Service

Credit for Renewable Electricity Production, Refined Coal Production, and Indian Coal Production, and Publication of Inflation Adjustment Factors and Reference Prices for Calendar Year 2014

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Publication of inflation adjustment factors and reference prices for calendar year 2014 as required by section 45(e)(2)(A) of the Internal Revenue Code (26 U.S.C. 45(e)(2)(A)), section 45(e)(8)(C) (26 U.S.C. 45(e)(8)(C)), and section 45(e)(10)(C) (26 U.S.C. 45(e)(10)(C)).

SUMMARY: The 2014 inflation adjustment factors and reference prices are used in determining the availability of the credit for renewable electricity production, refined coal production, and Indian coal production under section 45.

DATES: The 2014 inflation adjustment factors and reference prices apply to calendar year 2014 sales of kilowatt hours of electricity produced in the United States or a possession thereof from qualified energy resources, and to 2014 sales of refined coal and Indian coal produced in the United States or a possession thereof.

Inflation Adjustment Factors: The inflation adjustment factor for calendar year 2014 for qualified energy resources and refined coal is 1.5088. The inflation adjustment factor for Indian coal is 1.1587.

Reference Prices: The reference price for calendar year 2014 for facilities producing electricity from wind is 4.85 cents per kilowatt hour. The reference prices for fuel used as feedstock within the meaning of section 45(c)(7)(A) (relating to refined coal production) are \$31.90 per ton for calendar year 2002 and \$56.88 per ton for calendar year 2014. The reference prices for facilities producing electricity from closed-loop biomass, open-loop biomass, geothermal energy, solar energy, small irrigation

power, municipal solid waste, qualified hydropower production, and marine and hydrokinetic renewable energy have not been determined for calendar year 2014.

Because the 2014 reference price for electricity produced from wind does not exceed 8 cents multiplied by the inflation adjustment factor, the phaseout of the credit provided in section 45(b)(1) does not apply to such electricity sold during calendar year 2014. Because the 2014 reference price of fuel used as feedstock for refined coal (\$56.88) does not exceed \$81.82 (which is the \$31.90 reference price of such fuel in 2002 multiplied by the inflation adjustment factor (1.5088) and 1.7), the phaseout of credit provided in section 45(e)(8)(B) does not apply to refined coal sold during calendar year 2014. Further, for electricity produced from closed-loop biomass, open-loop biomass, geothermal energy, solar energy, small irrigation power, municipal solid waste, qualified hydropower production, and marine and hydrokinetic renewable energy, the phaseout of credit provided in section 45(b)(1) does not apply to such electricity sold during calendar year 2014.

Credit Amount by Qualified Energy Resource and Facility, Refined Coal, and Indian Coal: As required by section 45(b)(2), the 1.5-cent amount in section 45(a)(1), the 8-cent amount in section 45(b)(1), the \$4.375 amount in section 45(e)(8)(A), the \$2.00 amount in section 45(e)(8)(D), and the \$2.00 amount in section 45(e)(8)(10)(B) are each adjusted by multiplying such amount by the inflation adjustment factor for the calendar year in which the sale occurs. If any amount as increased under the preceding sentence is not a multiple of 0.1 cent, such amount is rounded to the nearest multiple of 0.1 cent. In the case of electricity produced in open-loop biomass facilities, small irrigation power facilities, landfill gas facilities, trash combustion facilities, qualified hydropower facilities, and marine and hydrokinetic renewable energy facilities, section 45(b)(4)(A) requires the amount in effect under section 45(a)(1) (before rounding to the nearest 0.1 cent) to be reduced by one-half. Under the calculation required by section 45(b)(2), the credit for renewable electricity production for calendar year 2014 under section 45(a) is 2.3 cents per kilowatt hour on the sale of electricity produced from the qualified energy resources of wind, closed-loop biomass, geothermal energy, and solar energy, and 1.1 cents per kilowatt hour on the sale of electricity produced in open-loop biomass facilities, small irrigation power facilities, landfill gas facilities,

trash combustion facilities, qualified hydropower facilities, and marine and hydrokinetic renewable energy facilities. Under the calculation required by section 45(b)(2), the credit for refined coal production for calendar year 2014 under section 45(e)(8)(A) is \$6.601 per ton on the sale of qualified refined coal. The credit for Indian coal production for calendar year 2014 under section 45(e)(10)(B) is \$2.317 per ton on the sale of Indian coal.
